

THE GREAT SCIENTIFIC FACT
*is that from abstract, matter came into being
through many different processes in between,*

*whereas THE GREAT NUCLEAR ACTION
in the universe will take place if such matter
is made to turn to its reverse order till the
atomic particles.*

**THIS IS THE UNPRECEDENTED AND UNIQUE
VIEW OF THE CREATION OF THE UNIVERSE**

At the first century of this New Millennium, for the dawn of a **New Scientific Age**, this **Forbidden Secret Creation Wisdom of the universe** should be revealed as the fulfilment of all the till-now learnings.

We challenge the entire scientific realm of the globe if there is any disagreement against these five-stepped processes of the creation, and thus the setting of the universe.

THE FIVE-STEPPED CREATION OF THE UNIVERSE

I. The Evolutionary process of creation

The Evolutionary process of creation was done from beyond the universe in the Infinity with the final outcome of the set Circular Big Vacuum Universe.

II. The Automatic set-up of creation

Then the Automatic set-up of creation was done from behind the universe in the already set Circular Big Vacuum Universe with the final outcome of Time with Space.

III. The Pre-nuclear and the Nuclear processes of creations

Then the Pre-nuclear and the Nuclear processes of creations were done in Time with Space with the final outcome of the Universe of neutral elements, while the interim outcome was the banging out of voice.

IV. The Superior scientific process of creation

As the final outcome of the Evolutionary creation, the Superior scientific process of creation was done in the Universe of neutral elements which is with the cohesive motion of two-tier conflicts and friction with the outcome of the positive and negative friction with the North Pole and the South Pole.

All the above-seen four steps of creations were done while there was no set Matter universe.

V. The process of matter creation through dissolution (Creation through dissolution)

But the process of matter creation was done only through the passing of fervent heat for the dissolution of the neutral elements.

Physical science with all the Physics and with all the Chemistry is related only here.

Biology with all the Botany and all the Zoology is related to the further proceeded lives as the further proceeded derivatives from the effect of the creation of the Matter universe.

Though the basis of Mathematics is seen in the application of creation of the universe, the detailed Mathematics is seen in the setting of the Matter universe. It is obvious that Mathematics is related to all the five steps of creation.

Nevertheless, all the branches of Mathematics known to the mankind are mainly related to the setting of the Matter universe.

While one type of unknown Higher Mathematics is related to the Evolutionary process of creation,

then another type of unknown Higher Mathematics is related to the Automatic set-up of creation;

then another type of unknown Higher Mathematics is related to the Pre-nuclear and Nuclear processes of creation,

and then another type of unknown Higher Mathematics is related to the Superior scientific process of creation.

THE GREAT CREATION POWER WITH THE GREAT CREATION ENERGY WAS THE SOURCE OF CREATION

If the Evolutionary process of creation is the first step of creation, the Process of matter creation is the fifth step. Before the Evolutionary process of creation, beyond Infinity, in all the Ages of the past there was the Great Creation Power together with the Great Creation Energy as the Source of creation. The Great Creation Power was firstly moved with its triangular motion for the Evolutionary process of creation through the Ages of Infinity. But the Great Creation Energy that had been in dormant state till the very end of the Superior scientific process of creation, further moved for the Process of matter creation as the Great Creation Energy through the passing of fervent heat.

THE PLANNING OF CREATION

The first step of creation started through the setting of the Planning of creation. The Planning of creation of the universe consists in the Concrete idea, Concrete ideology, Knowledge and Hidden knowledge.

From when the Planning of creation of the universe was in its application, there were the actions of creation of the universe done inexplicably and wonderfully.

I. THE EVOLUTIONARY PROCESS OF CREATION

The Evolutionary process of creation started through the triangular motion of the Great Creation Power. **The results happened one by one, because of the Evolutionary process of creation in all the Ages of Infinity.**

1. THE TIME-DEEP

Because of the many many crores × crores of the Ages of years that passed as the Infinity, there was the Time-deep.

2. DIFFERENT RATIOS OF DARKNESSES THAT PROGRESSED IN THE TIME-DEEP

From abstract darkness → to the twilight darkness → to the darkness that is seen → to the gross darkness → to the concentrated and saturated deep darkness → to the thick darkness → to the touchable darkness.

3. THE SHADOW UNIVERSE

Because different ratios of darknesSES got progressed in the Time-deep, there was the Shadow universe as the shadow for the Vacuum stage of the universe.

4. THE UNSHAPENED (SHAPELESS) VACUUM SPACE UNIVERSE

From the Shadow universe, there evolutionarily progressed the unshapened Vacuum Space universe.

5. THE SET CIRCULAR BIG VACUUM UNIVERSE

From the unshaped Vacuum Space universe, further evolutionarily progressed the set Circular Big Vacuum Universe as the prior-prepared runway for the oncoming Physical universe of matter that is to be set by its being hung in the gravitational force of the same Circular Big Vacuum Universe.

II. THE AUTOMATIC SET-UP OF CREATION

The Automatic set-up of creation started through the starting of the Vacuum motions against the till-then existing Vacuum conflicts.

This happened in the Circular Big Vacuum Universe from the setting of that Circular Big Vacuum Universe. Thus from the setting of the Circular Big Vacuum Universe, there started to spread the light in the darkness from the starting of the Vacuum motions against the till-then Vacuum conflicts. Here, the Vacuum motions is the embodiment of the light that moved against the till-then Vacuum conflicts, being the embodiment of darkness. This shows that the Vacuum conflicts, that stand for the darkness, have been from the Infinity Ages. But the Vacuum motions, that stand for the light to shine against/in the darkness, are from the setting up of the Circular Big Vacuum Universe.

When such Vacuum motions positively moved against the Vacuum conflicts—which stand negatively—in the Circular Big Vacuum Universe for the span of crore \times crore years ($1000 \times 1000 \times 10,000 \times 10,000$ years), in its completion there started the **Beginning of creation** with the first Time wave, even with the result of the first division, first split, first friction, first conflict and first motion. Thus further the Time wave surpassed with its never-endingly non-stop power, where the further each Time wave of half a second is further with the above-said set of five actions of division, split, friction, conflict and motion.

Thus further, crores \times crores of Time waves passed on, and each is with division, split, friction, conflict and motion. Thus there was the filling up of the waves of ideologies in the horizon motion each with a set of five actions of division, split, friction, conflict and motion, and such each set of five actions of division, split, friction, conflict and motion was led by each Time wave in its non-stop level. **Thus there started such a non-stop motion of Time Energy as**

the first energy in the creation of the universe. This is the Time beyond the Space or the Time with Space as the final outcome of the Automatic set-up of creation, where there was set **the horizon of the universe** representing Time with Space. So **the Space of the Physical universe of matter** is to be within such a **horizon of Time power** [Surely, the horizon was set through the horizon motion that was in the filling up of the waves of ideologies].

III. THE PRE-NUCLEAR AND NUCLEAR PROCESSES OF CREATIONS

If the Automatic set-up of creation started crore \times crore ($1000 \times 1000 \times 10,000 \times 10,000$) years ago, the Pre-nuclear stage started 2300 crore years ago, and further the Nuclear stage started 704 crore years ago, through the First nuclear explosion that took place with the outcome of the banging out of voice.

If firstly the circumference of the Circular Big Vacuum Universe, that is set through the automatic set-up of creation, which is known as the Metaphysical universe being with the 14 fold area of the Time and Space, is about 33,000 light years distance,

secondly, the circumference of the horizon set through the Pre-nuclear stage is 2300 crore light years distance,

and thirdly, the maximum plinth area of the Space that is set within the horizon through the Nuclear stage is 1990 billion square light years distance.

[In such a Space, fourthly the Matter universe can be maximum developed with 2 Beta stars, that is, $2 \times \text{crore} \times \text{crore} \times \text{crore} \times \text{crore}$ stars, being with their planets.]

THE PRE-NUCLEAR STAGE FROM 2300 CRORE YEARS AGO

After crore \times crore years of Vacuum motions against the Vacuum conflicts with the resultant defeat of the Vacuum conflicts, through the first Time wave 2300 crore years ago, the Vacuum conflicts is firstly divided with the resultant conflict of the knowledge of good and the knowledge of evil, where the high tension conflict started between the knowledge of good and the knowledge of evil.

This is the **first division** under the first Time wave, where resultantly there is also the **first split** under the first Time wave; resultantly there is also the **first friction** under the first Time wave; resultantly there is also the **first conflict** under the first Time wave; and resultantly there is also the **first motion** under the first Time wave.

Further there is the second Time wave with all the above-said five actions of division, split, friction, conflict and motion under that second Time wave.

Because of the never-endingly ever non-stop of the Time waves, where each Time wave is half a second, within that half a second itself (within that one Time wave itself) there happened the five actions of division, split, friction, conflict and motion, through which there started the waves of ideologies.

Likewise, in the crore \times crores of Time waves, each with the above-described five actions of division, split, friction, conflict and motion, there was the filling up of the waves of ideologies in the horizon motion **as the filling up of the waves of ideologies from the knowledge of good and the knowledge of evil.** *Surely ideologies can be filled up only in horizon motion like the waves of water that spread circularly.*

THE NUCLEAR STAGE FROM 704 CRORE YEARS AGO

After 1600 crore years of the filling up of the waves of ideologies, during the 1600 crore years of the Pre-nuclear stage, there took place the First nuclear explosion through the great bursting out of the just-filled-up waves of ideologies with the resultant banging out of voice, which voice then spread out into Seven types of Mighty voices such as the Majestic voices, the Glorious voices, the Mighty voices, the Powerful voices, the Breaking voices, the Voices as the voice of many waters and the Voices as the voice of mighty thunderings.

After certain crores of years of greatly together-echoing of the Seven types of Mighty voices, they were turned into great booming voices with its incredibly great power and with the invincibly and exceedingly surpassing energy.

THE UNIVERSE OF NUCLEAR STAGE IS OF THE MIGHTILY ECHOING OF VOICES IN HUNDREDS OF CRORES OF YEARS

The already filled-up waves of ideologies of the 1600 crore years of Pre-nuclear stage got burst out 704 crore years ago.

1. So, at first there was a great bursting out as the bursting out of the till-then stored and filled-up waves of ideologies.
2. Thus then took place the First nuclear explosion with the resultant banging out of voice.
3. Such an exploded banging out of voice got spread out into the Seven types of Mighty voices such as:
 - (i) The Majestic voices
 - (ii) The Glorious voices
 - (iii) The Mightily echoing voices
 - (iv) The Powerfully reverberating voices
 - (v) The Breaking voices
 - (vi) The Voices like the voice of many waters, and
 - (vii) The Voices like the mighty thunderings
4. Thus, all these Seven types of Mighty voices collectively echoed as the great booming voices.
5. Thus there was generated the incredibly great power.
6. From both the echoing great booming voices and the incredibly great power, there was generated the invincibly and exceedingly surpassing energy.
7. Thus further, the Universe of nuclear energy is turned as the Universe of great booming voices with its incredibly great power and then with the invincibly and exceedingly surpassing energy.

These are totally the exposed Universe of nuclear energy that continued for a long while, even for hundreds of crores of years.

THE TILL-THEN NUCLEAR STAGE, THAT WAS ONLY WITH THE THREE ASPECTS OF THE ECHOING OF MIGHTY VOICES, THE EMERGENCE OF GREAT REVERBERATING POWER, AND THE PROJECTING OF SURPASSING ENERGY STILL WITH ITS ECHO AND POWER, CAME TO AN END.

Finally through a great conglomeration, there was a conclusion of the till-then hundreds of crores of years of mightily echoing voices.

Thus here the till-then Nuclear stage of the universe with the mightily echoing of booming voices, with its incredibly great power, and exceedingly surpassing energy has concluded for the emergence of a new stage of the projection of the processes of creation through the great conglomeration.

Thus from then, there was the Universe of neutral elements in projection audibly, visually and tangibly through the always flashing brightest and best amber lightnings without any stop, with the loud and mighty peals of thunder unceasingly, and with the continuous echoing of boisterous and reverberating multi-dimensional noises continuously.

IV. THE SUPERIOR SCIENTIFIC PROCESS OF CREATION

Together with the Evolutionary creation, while further there was the Automatic set-up of creation and while still further there was the Pre-nuclear and Nuclear processes of creation, fourthly there was the Superior scientific process of creation done in the Universe of neutral elements of the always flashing brightest and best amber lightnings, in the unceasingly loud and mighty peals of thunder, and in the continuous echoing of boisterous and reverberating multi-dimensional noises.

The Superior scientific process of creation started with the cohesive motion of two-tier conflicts and friction,

together with the till-then existing conflicts between the knowledge of good and the knowledge of evil—that had been existing from the beginning of the Pre-nuclear stage—and subsequently there started the friction between the positive and the negative, which is the from-then started derivative out of the already existing conflict between the knowledge of good and the knowledge of evil. Here, its derivative is the friction between the positive and the negative, with the North Pole and the South Pole.

THE MAJOR SCIENTIFIC FACT BEHIND THE MATTER UNIVERSE

The already existing conflict between the knowledge of good and the knowledge of evil [from which all the waves of ideologies got sprouted] and its derivative, the friction between the positive and the negative, from which the Cosmic lives got derived.

Thus the cohesive motion of both ideas and actions is through the two-tier conflicts and friction of both the already existing conflicts between the knowledge of good and the knowledge of evil [that is even from the beginning of the Pre-nuclear stage] and the freshly originated (as its derivative) the friction between positive and negative with the North Pole and the South Pole. This stage is from/with the ending of the projection of the Nuclear stage of the universe, but which had been but limited only with the projection of the echoing of voices with its power and energy where further freshly there started the projection of the Universe of neutral elements.

FROM THE ABSTRACT STAGE TO THE PROJECTED STAGE

It is to be clarified that in the Pre-nuclear stage while there was the motion of Time Energy through which there was the filling up of the waves of ideologies in the horizon motion, purely it was abstract through the abstract actions, where there was not any projection for that Pre-nuclear stage.

But the Nuclear stage was in projection with the projection of the echoing of Mighty booming voices, the emergence of great reverberating power, and the projecting of surpassing energy still with its echo and power. This was the firstly happened projection in the history of the creation of the universe.

Further, the Universe of neutral elements was in the acute projection audibly, visually and tangibly through the always flashing brightest and best amber lightnings, then through the unceasingly loud and mighty peals of thunder and then through the continuous echoing of boisterous and reverberating multi-dimensional noises, but not yet with any matter projection.

In this stage of the projected Universe of neutral elements, the Superior scientific process of creation was done for which there started the cohesive motion of two-tier conflicts and friction. Only here the friction between the positive and the negative started as the derivative of the already existing conflict between the knowledge of good and the knowledge of evil.

Different steps of the behind-Cosmic lives got emerged as the effect of the friction between the positive and the negative

1. The set North Pole and against it/opposed to it the South Pole
2. The attraction towards one side and the repulsion towards the other side
3. The universally working magnetic power under the gravitational force of the Circular Big Vacuum Universe
4. The universally always revolving whirlwind from the North towards the South with the time-to-time happened tempest.

So prior to the formation of the Matter universe, there was a universe audibly, visually and tangibly (but still not as matter), being with both the cohesive motion and the behind-Cosmic lives there. This is from the very end of the Nuclear stage.

THE FOUR-DIMENSIONAL COSMIC LIVES, EACH IN FOUR STEPS

1. The four Superior Cosmic lives till the conflict between the knowledge of good and the knowledge of evil

- (i) The different ratios of darkneses that originated in the Evolutionary process of creation
- (ii) The superior light that firstly originated to shine in the darkneses/against the darkneses for the process of the Automatic set-up of creation
- (iii) The gravitational force that originated from the setting of the Circular Big Vacuum Universe
- (iv) The waves of ideologies that originated in the Pre-nuclear stage from/through the conflict between the knowledge of good and the knowledge of evil such as: the waves of ideas, the waves of ideologies, the waves of knowledge and the waves of hidden knowledge behind the universe, all of which are to be passed through the entire universe.

2. The four behind-Cosmic lives from the friction between the positive and the negative

- (i) The function of the North Pole and the South Pole
- (ii) The attraction with the repulsion against that attraction
- (iii) The universally working enormous magnetic power
- (iv) The universally always revolving whirlwind that can sift and sieve anything anywhere

3. The four Cosmic lives in direct link with the formation of the Matter universe

- (i) The very extensively passed fervent heat
- (ii) The universally flowing sea of fire as the universally flowing sea of life
- (iii) The Cosmic light after which the stars and the planets follow
- (iv) The Creative voice Logos which is the Cosmic life of the Matter universe, and through which the material attractive system of the Matter universe also is set

4. The four lives that originated through/after the creation of the Matter universe and that work as the below-Cosmic lives

- (i) The Product life of the stars and planets together with the within voice-life of the stars and planets
- (ii) The ideological attractive system within the inhabited planets to keep the inhabitants alive ideologically, so that the inhabited planet is kept alive in the material attractive system
- (iii) The Sound Energy is the derivative from the Creative voice Logos and that Sound Energy is the reason for the superior brooding life in the animal world for imparting the unique power of the natural instincts in them.
- (iv) The Atmospheric life from which there is the botanical life and the zoological life.

*V. THE PROCESS OF MATTER CREATION
THROUGH DISSOLUTION*

*[Unlike the earlier processes of creation, here the creation
was through dissolution
and
Unlike the earlier steps of creation, only here was passed the
extensively fervent heat].*

All the earlier four steps of the processes of creation and the set earlier four layers of the universe only led to the setting of the Matter universe of stars and planets.

1. As the set first layer of the universe, there was the 14 fold Circular Big Vacuum Universe, set at first for the sake of the forthcoming Matter universe to rotate through its 14 fold vacuum area, and thus the forthcoming Matter universe is to exist forever through its rotation forever in the 14 fold vacuum area, where also the Matter universe—in rotation—is to be hung forever in the remaining 13 fold vacuum area through the gravitational force of such a great vacuum area in 14 fold. Moreover, through the setting of the always vacuum motions against the vacuum conflicts in that 14 fold area of the Vacuum universe, there is the set **Universal mind** in it to control every aspect of the universe through such Superintellect, Super emotion, Super will-power, Super mind, Superconscience and the Super level internal utterance. All these are **the God-particles in the creation of the universe.**
2. As the set second layer of the universe, there was the set Pre-nuclear stage in horizon motion, and in the Time Energy, and in the filling up of the waves of ideologies for the sake of the forthcoming Matter universe to be with its horizon; the waves of Time; the waves of ideas; the waves of ideologies; the waves of knowledge and to be with the waves of hidden knowledge, into their passing on throughout everywhere in the Matter universe, which is within the set horizon.
3. As the set third layer of the universe, there was the set Nuclear stage through the great bursting out as the First nuclear explosion with the resultant banging out of voice for the sake of preparing the Space to absorb all the stars and planets that are to be contained into its respective space with enough gap of the respective atmosphere for each star and for each planet.

4. As the set fourth layer of the universe, there was the set Universe of neutral elements of the always flashing brightest and best amber lightnings, of the unceasingly loud and mighty peals of thunder, and of the continuous echoing of boisterous and reverberating multi-dimensional noises for the sake of the neutral objects to be dissolved for the Creation of the Matter universe.

INTO THE SCENE OF THE CREATION OF THE MATTER UNIVERSE

For the sake of the Creation of the Matter universe, at the very end of the projection of the Universe of neutral elements, finally there was the unique projection through the concentration of the neutral elements into a particular point. This concentration into a particular point looked as if it were a man-form. So this finally happened projection was into the projection of the man-likeness.

Here, the already exposed Universe of neutral elements got into the heavy compression and thick concentration into a particular point, where it appeared into a shape into the similar man-like look, but with great amber colour and with the surrounding exposition of rainbow brightness, against which was then passed the extensively and enormously great fervent heat and thus happened the greater and Second nuclear explosion in the history of the creation of the universe together with the-then proceeded Nine Thundering voices *[These Nine Thundering voices later became the veins of the Matter universe like the veins seen in a decayed leaf]*. Here there is the outcome of the gushing of the Universal ocean of unquenchable fire.

Here, in a nutshell, the process of Creation of the Matter universe started through the dissolution of the already thickly concentrated neutral elements, with a greater bursting out as the Second nuclear explosion, together with the proceeded Nine Thundering voices with the resultant gushing out of the Universal ocean of unquenchable fire.

Through the attraction and repulsion of the already existing North Pole and the South Pole together with the friction of the positive and the negative, this Universal ocean of unquenchable fire got spread even through the help of the universal level universally working enormous magnetic power, where the universally always revolving whirlwind helped the Universal ocean of unquenchable fire to be amplified into great velocity and great speed. So here it is clear that the universal level forces that already proceeded as the External lives of the universe really here became a help for the amplification of the gushed-out Universal ocean of unquenchable fire into its required state of vastness and required measurement for the yet-to-be-formation of the Universe of matter.

**THE UNIVERSE OF SLOWLY HAPPENED COOLING DOWN
WITH THE BY AND BY EMERGENCE OF MATTER
AS PER THE STEP BY STEP COOLING DOWN**

There was a particular point of stop for the amplification of the Universal ocean of unquenchable fire, where started the emergence of Nine universal level Musical voices [*These Nine universal level Musical voices later became the ingrained life of the Matter universe further to proceed on occasion and in need.*] together with the slow process of cooling down of the already overspread and amplified Universal ocean of unquenchable fire, where for such a slow process of cooling down, the Nine universal level Musical voices became the help together with the always blowing universal level tempest.

As I looked, I saw a great storm coming toward me from the northern pole of the universe—driving before it a huge or an immense cloud that flashed with lightnings and shone with brilliant light. The centre of the fire looked like glowing matter out of the midst of the fire.

Thus, from the first step of slow cooling down of the Universal ocean of unquenchable fire in the midst of both that cooling down fire and the always blowing universal level tempest, there was the emergence of matter as **the very highly qualified and most brightest precious stones**. In the like manner, further **the secondly high qualified and brightest precious stones** came out through the second step of slow cooling down, and again in the like manner, further **the highly qualified and brightest fine gold** came out through the third step of cooling down, and so on.

THE FORMATION OF THE MATTER UNIVERSE THOROUGH THE SETTING OF THE STARS AND PLANETS AS THE BROKEN AND SKIPPED PIECES OF THE ENORMOUSLY EMERGED VERY HUGE QUANTITY OF MATTER.

Finally, there was the formation of the Matter universe [But at first, this formation of the Matter universe was only in 6/9 area with the liable condition of its by and by developed creations.] out of the setting of the stars and planets which are only the broken pieces of the enormously emerged huge quantity of matter,

and those pieces were then skipped into very great distance—through the power and the action made out of the universally working enormous magnetic power and the universally always revolving whirlwind that can sift or sieve or take anything to anywhere—to set them in their correct path of the rotation and revolution.

Here all the already proceeded Universal forces as the External lives of the universe such as the universal level universally working enormous magnetic power and the universally always revolving whirlwind together with the always-blowing universal level tempest helped to pick up or to skip each piece into its correct path of rotation and revolution through the use of the setting mathematical scale and mathematical evaluation of the area of atmosphere of each star and the area of atmospheric life of each planet. Thus for this final action of setting the Matter universe, the **Universal Mathematics** emerged as the very necessary and useful factor of Mathematics to set the Matter universe in correct measurements of distance between each other, even with the correct gap for the atmosphere of each.

THE DIFFERENT FIVE PIVOTAL LIVES UPON/OF THE UNIVERSE IN RELATION TO THE CONFLICTS AND FRICTIONS

1. For the Circular Big Vacuum Universe where there are the gravitational forces and where the Universe of matter collectively rotates, the Vacuum motions against the Vacuum conflicts is the pivotal life, where the Vacuum motions are in victory upon the Vacuum conflicts.
2. For the abstract state of the universe which was the Pre-nuclear stage of the universe, the conflict between the knowledge of good and the knowledge of evil is the pivotal life.
3. Exclusively for the Universe of nuclear stage, the conflict between the gravitational force from the Circular Big Vacuum Universe and the overspreading and developing mighty booming voices with its incredibly great power and invincibly and exceedingly surpassing energy of the being-set Space is the pivotal life, where finally the gravitational force from the Circular Big Vacuum Universe is in victory upon the overspreading and developing mighty booming voices with its incredibly great power and invincibly and exceedingly surpassing energy.

4. But for the stage of the Universe of neutral elements, the cohesive motion of ideas and actions worked. This is through the from-a-long-while existing conflict between the knowledge of good and the knowledge of evil which germinated its derivative as the friction between the positive and the negative, together being the pivotal life of the Universe of neutral elements.
5. Further for the Universe of matter, the friction between the positive and the negative with the North Pole and the South Pole attraction and repulsion together, is the pivotal life.
