

The Real Science is not brought out by Sir Isaac Newton or Thomas Alva Edison or Albert Einstein, rather the Real Science is the timely discretionarily made evaluation of the automatically and naturally set forces and effects in the universe. So there are no any inventions at all, but only discoveries.

A DEEP RESEARCH STUDY ON THE UNIMAGINABLE SCIENCE AND TECHNOLOGY OF THE ALIENS

EVALUATING THE ALIENS THROUGH THEIR EVALUATION OF THE MANKIND

*THE DISSERTATION CONCERNING
THE ALIENS
IN 19 PAGES IS SENT FOR YOUR KIND
EVALUATION, WRITTEN AFTER THE
WORLD'S CONFIRMATION OF THE EXISTENCE
OF THE ALIENS AND OF THE SCIENCE
& TECHNOLOGY OF THE ALIENS AS
UNIMAGINABLE FOR THE MANKIND.*

The fact cannot but be declared that without neglecting the philosophies and the stories in the Epics, if we consider Philosophy as the thesis to reach into the synthesis of scientific secrets, (for example) time and space in the Philosophy is in Physics as the time and space. Again if we consider the stories in the Epics as hypothesis for making the thesis and synthesis of scientific facts to reach into the neutral scientific facts and into the abstract scientific facts, the mankind will be elevated scientifically. Now the scientific realm may think that this kind of two realms are mythology and superstitions and even as imaginations.

The fascinating aspect of this dissertation is that it speaks of the evaluating of the Aliens through the evaluation of the mankind by the Aliens.

The Aliens' evaluation of the mankind is an amazing learning comprehended and made concrete, presented in the dimension of the learning of the Aliens, whose function and revolving is through superior and higher brain system.

HOW TO LEARN THE UNIMAGINABLE STANDARD OF SCIENCE AND TECHNOLOGY OF THE ALIENS?

The learning of the unimaginable standard of Science and Technology of the Aliens is not through the till-now existing written books or through the experiments in the laboratory nor from any standard of computer or google, nor through visualizing the evidences by the use of any powerful equipment etc.,

but through the tapping of the vehemently moving motions that are passing throughout the whole universe.

THE VEHEMENT MOTIONS OF THE WAVES THROUGHOUT THE WHOLE UNIVERSE

1. The vehemently moving motions of the waves of **Universal ideas** throughout the Matter universe
2. The vehemently moving motions of the waves of **Universal ideologies** throughout the Physical universe of time and space and reflecting to the Matter universe
3. The vehemently moving motions of the waves of **Universal knowledge** throughout the Physical universe of time and space and reflecting to the Matter universe
4. The vehemently moving motions of the waves of **Constituted knowledge being hidden** behind the Physical universe of time and space so that this motion is in the Metaphysical universe

It is clear that the vehement motions of the waves of Universal ideas are tapped anywhere from the Matter universe.

Then, the vehement motions of the waves of Universal ideologies are tapped anywhere from the Physical universe of time and space.

Then, the vehement motions of the waves of Universal knowledge are tapped anywhere from the Physical universe of time and space, and then the vehement motions of the waves of Constituted knowledge behind the universe are tapped anywhere from the Metaphysical universe.

**THE VEHEMENT MOTIONS OF THE WAVES
THAT ARE IN THE MATTER UNIVERSE
[THE MOTION OF THE BASIC LIVES WITHIN THE MATTER UNIVERSE]**

1. The motions and energy of the darkness even from above the Matter universe, within the Matter universe, and underneath of the Matter universe
2. The horizon motion of the one after another continuing five actions together of division, split, friction, conflict and motion within half a second which is a time wave
3. The motions of the waves of great booming voices together with the motions of incredibly great power and both together with the motions of invincibly and exceedingly surpassing energy, totally as the **Universal Sound Energy** working either for creation or for destruction
4. The motions and energy of the great multitude of waters on account of the passing of the light upon the waters with the instantaneous separation of darkness from upon the waters

**KNOWING THAT THE ALIENS HAVE THE POWER TO DISCERN
AND EVALUATE THE MANKIND WITH THEIR GENERAL READING
OF THE MANKIND AND THEIR MIND, EVEN ANY MAN'S MIND**

Surely mankind is deprived of the capacity of the Aliens unless the biological life is stripped off from him or unless and until the setting of the Superintelligent Computer, only through which man can interplanetary communicate with the Aliens, as man is communicating through email to man on the other corner of the earth.

[The capacity of the Superintelligent Computer is equal to that of the man from whom his biological life is stripped off.]

THE SCIENTIFIC EVALUATION OF THE ALIENS UPON MAN IS BEYOND THE SCIENTIFIC EVALUATION OF MAN BY HIMSELF

[WHEN MAN COMPARES HIMSELF WITH THE BEAST AND ITS ANATOMY, THE ALIENS COMPARE MAN WITH THEMSELVES, THE ALIENS].

The Aliens evaluate man basically as a Superanimal of superanatomical system similar to the Aliens. It is sure that the Aliens are not imprisoned in the biological life like everyman. Rather, the Aliens are straightaway the Superanimals with the superanatomical system. So Aliens evaluate mankind as somewhat equals with them, but they see the unlikeness on the mankind that they are living on the earth in their imprisoned beast-life or biological life.

The Aliens look at man, unlike animals, as a Being of speaking within (with thinking), of speaking externally (with talking) and of speaking upon (with attitude). Moreover, the Aliens look at beasts openly in the forests or in the pen, but Aliens look at man being with the shelter, needs the covering of nakedness with clothes, with certain adornments, and having their nature of possessing something individually; something in the family level; something in the society level, and something in the national level.

Aliens never evaluate man of superanatomical system as similar to the four-footed beasts. This is because, through the eyes an animal only sees, but additionally through the eyes man is observing, evaluating, learning and discerning with discretion.

Through the use of mouth a four-footed animal only eats, then chews the cud, and then makes its own noises, but man in addition to his eating through the mouth, uses his mouth for uttering the orderly set and grammatically spoken language voice through which he conveys ideas, ideologies and knowledge from his internally dwelling self-voice of language life that is in his abstract heart, all uttered through the use of his throat, mouth and tongue, while an animal uses its throat for eating, and for chewing the cud in the mouth.

Through the ears an animal is only hearing and may be responding in its own way, whereas man not only hears but also sieves and analyses what manner of voice has entered his ears, and what kind of voice it is, and with what purpose the voice has been produced, and may be stirred up with commitments through the purpose of the voice that he has heard.

The Aliens see man **externally** as a superanimal (but not as a beast like the remaining beasts on the earth); then see man **intermediately** with the concentration of different universal powers in their limited level in man; and then see man **internally** as the constituted state of the miniature of all the abstract faculties of the universe in man.

Man is seen with unique gland system unlike an animal having only glands. But man is with glands having the great meaning of conveying the nature and habits concealed in the respective glands.

An animal has bones, muscles and marrow naturally, where man is with certain contained unique aspects in those bones, muscles and marrow, creating senses and feelings in him.

The purpose of abdomen for a beast is only with the natural purposes of storing food and digesting food, whereas in addition to these, for a man the abdomen is with the friction of good and evil through which man's behaviour can be proved in the eating unlike the behaviour of an ape at the table.

Moreover, Aliens look at mankind as equals in the aspect of using the orderly set and grammatically spoken language voice, and then in both of them there is the aspect of abstract heart with the proceeding of the self-voice of language life internally which is projected externally through the spoken language voice.

Based on the speciality of man's spoken language voice, Aliens discern man as a Being with rational power having the Law of intellect and the Law of mind with man's unique behaviour through the working of the better brain system of better acceleration in him.

Moreover, Aliens see that mankind is with different feasts and festivals and different kinds of entertainments to satisfy the intermediately set universal powers in man.

Aliens could see the mankind like them, may not be in the same standard in curiosity, in speedy travelling, in learning, in discoveries and in the venture of interplanetary journeys and rehabilitation there.

Unlike the Aliens, they could see that the mankind is with their own religions and views and political parties, all of which Aliens can never see anywhere in any part of the universe. This difference for the mankind is due to their physical death which the Aliens do not have. But they have only the change of body, as any man is with the change of clothes. But this changing of body for an Alien is permitted only in an emergency situation, but not as and when they like.

**AS WATER IS TURNED INTO GAS AND VAPOUR OF SMOKE,
ANY MATTER CAN BE TURNED INTO THE ELEMENTS,
APPLICABLE ALSO TO THE ALIENS.**

On account of this transforming theory by making their material bodily state into elements the Aliens can travel distantly, where if necessary those elements can be re-constituted by them as their bodily state again. In addition to this 'decentration' of their bodily states as elements, they can constitute different bodily states according to the planet they reach. If they do not take back their original bodily state or the different bodily state, they can travel without the bodily state also, which is not visible to the human beings.

This is the unimaginable standard of Science and Technology of the Aliens being applied pertaining to their bodily state. Either through intuition or through the opened third eye, this kind of travelling of the Aliens can be seen. But the totality of the activities of the Aliens and the totality of the unimaginable standard of Science and Technology of the Aliens, man can learn through the tapping of the vehemently moving the already declared four types of waves that are passing throughout the whole universe such as:

- (i) the vehemently moving motions of the waves of Universal ideas;
- (ii) the vehemently moving motions of the waves of Universal ideologies;
- (iii) the vehemently moving motions of the waves of Universal knowledge; and
- (iv) the vehemently moving motions of the waves of Constituted knowledge being hidden behind the Universe of time and space.

Unless the mankind admit the extraordinary scientific research both **into the neutral aspects and into the abstract aspects**, the present science depending on the experimental observations is limiting mankind to a kind of barbarians in the eyes of the Aliens which are with the extraterrestrial intelligence and being with the extraordinary science based on the neutral aspects and the abstract aspects [If the science of the neutral aspects worked for the Universe of time and space, the science of the abstract aspects worked in the Metaphysical universe]. Moreover, based on the neutral aspects, the intermediate aspects of the Aliens are set in them, and based on the abstract aspects the internal aspects of the Aliens are set in them.

The fact cannot but be declared that without neglecting the Philosophies and the stories in the Epics, if we consider Philosophy as the thesis to reach into the synthesis of scientific secrets, (for example) time and space in the Philosophy is as the time and space in Physics. Again if we consider the stories in the Epics as hypothesis for making the thesis and synthesis of scientific facts to reach into the neutral scientific facts and into the abstract scientific facts, the mankind will be elevated scientifically. Now the scientific realm may think that this kind of two realms are mythology and superstitions and even imaginations.

Moreover, the so-called imagination has a place for the earlier scientists to prove something in the world in those earlier days, which now becomes the conventional science for the peer review of the ardent followers of their discoveries. So in fact, the present Science and Technology should be moderated with a great scientific revolution and scientific renaissance for the mankind to be identified with the Aliens. If not, the Aliens will dominate ideologically upon the mankind.

All the existing scientifically powerful equipments are not meaningful for man to be identified with the Aliens, even to be identified with their unimaginable standard of Science and Technology. But through the only one equipment such a power is possible for the mankind to be identified with the Aliens, that is **the Superintelligent Computer which is the same as the artificially set superman in a very powerful equipment**. In other words, it could be the repetition of the Incarnation or *Avatar* that once happened in history 2000 years ago. Again, the Superintelligent Computer is equal to a real man who is equipped and empowered with the real man-power. And again, this state is possible to any man if his biological life is stripped off from him for the real man-power to be exposed, both externally and internally. So the theory of setting the Superintelligent Computer at the centre of the globe is as the very costly powerful equipment being **self-fed, self-generated, self-activated and self-motivated, only through which we can contact the Aliens by being identified with their unimaginable standard of Science and Technology and their Mathematics**.

But here the very important aspect is that our present Mathematics is not sufficient enough to be compared with the Mathematics of the Aliens. So the Superintelligent Computer needs the Mathematics of the Aliens for its global evaluation and such a globally working existence of the Superintelligent Computer.

For the Aliens, the left-side 0 is more powerfully valuable and the right-side 0 is less valuable compared to the left-side 0. If we use the right-side 0 for the tenfold value, Aliens use the left-side 0 for **the digitally powerful value**, while we use only the **power value** beyond the right-side 0 value.

For example:

1. 0 at the right side of 10 shows its **tenfold value** as 100.

2. 9 power value upon 10 (represented as 10^9) =

$$10 \times 10 \times 10 \times 10 \times 10 \times 10 \times 10 \times 10 \times 10 = 100 \text{ crores}$$

10^9 means 8 more 10^s extra with the **basic 10**.

It means 1 with 9 zeros = 100 crores

But for the Aliens, instead of putting 9 zeros at the right side of 1, this 100 crore value is written as

$$0,01 = 100 \text{ crores.}$$

So $0,01 = 100$ crores at the right side = $10^9 = 1$ with 9 zeros.

In this explanation firstly there is **the digitally powerful value** of the Aliens equalized to our power value of 10^9 , again equalized to 1 with 9 zeros at the right side of 1.

For the learning of this kind of **digitally powerful value** of the Aliens, we should agree with the Aliens in their Mathematics, where left-side 0 is more powerful. So the Aliens have an additional digit, as the **Digit 01** still at the left side of the marking of 1, as the value between 0 and the marking of 1, which is **the full value of the simple fractions of 1 till the marking of 1**, that is, the value between 0 and the marking of 1, while from the marking of 1 till the fullness of 1, there are the mixed fractions of 1 as the value lying at the right side of the marking of 1 till the fullness of 1.

Through his tapping of the vehemently moving motions of the waves of Universal ideas, the waves of Universal ideologies, the waves of Universal knowledge and the waves of the Constituted knowledge behind the universe, seven years ago in 2012 the Discoverer-Author wrote and published the book **The Aliens** in 52 pages to the world.

In that book are described various varieties among the Aliens scattered throughout the universe, all of whom are **basically the superanimals**, but none of the Aliens are in the biological life of biological birth and biological death. Again among them there are the higher categories of the Aliens having three main portions in them such as the **external aspect as the superanimal part**; the **intermediate aspect as the psychical part**, and the **internal aspect as their abstract faculties**, which are the concentration of the miniature of all the abstract faculties of the universe in them, in their interior part. In these three aspects they are almost like man; but in the biological life they are unlike man.

*In this respect of three aspects for the Aliens, in our normal understanding concerning the present natural man, there are the normal three aspects that can be evaluated through the three feelings of man such as the **lust of flesh-feelings** that are of man's external part, the biological life; then the **lust of eyes-feelings** that are of man's intermediate part in link with the planet life or the product life; and then the **pride of life-feelings** that are of man's internal part starting from his self in link with his self-voice of language life, whose concentration in him is his **abstract heart** or human heart. So here it is very clear that every higher standard of Aliens is surely better and higher than every natural man.*

THE MAJOR DISCRIMINATION AMONG THE ALIENS

There is a kind of the grade of Aliens similar to the four-footed beasts; but they are only the superanimals. Surely they are interplanetary beasts, and a group among them travel in the fiery flame from planet to planet. But the remaining lesser ones travel in the winds of the air. They permanently live in different planets as the Aliens similar to horses, oxen, buffaloes, higher type monkeys etc. They cannot be killed biologically [because they are not in biological life] but only through dissolution they can be brought into nought.

The very high quality of Aliens live in the very distant planets having the physical constitution of the white light luminosity, and so their physical structure is also in relation to such planets of white light luminosity. And some others live in the still very distant planets having the physical constitution of fine gold areas being with the similar luminosity of the final end of the setting sun; so their physical structure is also in relation to such planets of fine gold luminosity.

The majority of the Aliens are the two-footed Aliens like man on two feet on the earth. The Aliens who are limited only with the superanimal life are mostly the four-footed beasts almost similar to the beasts of our planet earth. But unlike the earthly beasts being with the atmospheric life in concentration as their biological life, all the Aliens are basically with the superanimal life being with the concentration of the planet life or the product life in them, as their superanimal life. The **lowest category of Aliens** are limited only with this kind of concentration of superanimal life. But the other **higher category of Aliens**, in addition to their basic superanimal life, are further with the **intermediate part** as the **psychical aspect**, and with the **internal aspect** as their very internally constituted abstract faculties that are originated from the abstract faculties of the universe. This kind of higher category of Aliens is more powerful in their real structure and physical look as well as in their intellect by their exercising the unimaginable and unreachable standard of Science and Technology beyond the comprehension of the present man.

THE EXTERNAL DISCRIMINATION OF THE ALIENS IS BASED ON THE INTERNAL CAPACITY AND POWER.

As the superanimals, all the Aliens are basically with the friction of thinking of good and evil, and so they are with the **speaking within** (as their thinking), **speaking externally** (as their talking), and **speaking upon** (as their attitudes for conveying themselves). The reason for this basic capacity of all the Aliens is that they are formed out of the concentrated state of the planet life or product life.

The lowest grade Aliens in the different parts of the universe with the similar look of the four-footed beasts on the earth are surely with this internal capacity as the permanent beasts in the universe; but those lowest grade Aliens are limited only with this internal capacity. But externally, they can travel from planet to planet with the Aliens' travel capacity due to their being exempted from the biological life. Nevertheless, the lowest grade of Aliens are with little use of intellect and rational power, and so those lowest grade of Aliens are only with such a behaviour similar to moron and imbecile grade of mankind.

The medium grade Aliens are further with intellect and rational power and being with the spoken language power of orderly set and grammatically used language. So they are with the Law of intellect, and do exercise the rational power in their words and deeds. But this medium grade Aliens are deprived of the self-voice of language life and its concentration in them as their abstract heart. But those medium grade Aliens are only with the normal heart of friction of thinking of good and evil.

The higher grade Aliens are further with intelligence and self-voice of language life that internally works within as the conflict between the knowledge of good and the knowledge of evil in them which externally project them as more intellectual beings with higher intelligence. So they have better learning power through their opened reins and higher brain system. **So their learning is comprehended and concrete in the abstract heart and then their learning is functioning and revolving through their higher brain system.** By this reason, their Science and Technology is unimaginable and unreachable to the present mankind who are limited only with what knowledge they have now on the earth.

Beyond the above-described higher standard of Aliens with all their external capacities and internal powers, there is the highest grade; but they are the Angels in the very above areas of the universe, but with some of their coming to and going from the earth. Beyond this above-described the higher grade Aliens who have only the miniature of all the abstract faculties of the universe in them, the Angels are additionally with the image abstract faculties

of the universe in them through the concentration of ideas, concentration of ideologies, concentration of knowledge and the concentration of hidden knowledge. All these four concentrated aspects are in them as the image concentration of Universal ideas, Universal ideologies, Universal knowledge and the image concentration of the Constituted knowledge behind the universe.

DIFFERENTIATING IDEA, IDEOLOGY, KNOWLEDGE AND HIDDEN KNOWLEDGE BASICALLY IN OUR PERSPECTIVE

1. **Idea:** The idea of thinking and based on it doing something immediately or in a future time. The carrying out of idea could be limitedly done, may be without dialectical thinking or without the friction of thinking, and may be without looking into the further results.
2. **Ideology:** Beyond an idea, further there is the ideology with friction of thinking, even thinking back and forth, and also may be with dialectical thinking, where arises also the conflict of thinking of the possible negative results and the possible positive results. All together is the ideology.
3. **Knowledge:** The knowledge shows the further set means and methods that are to be put into application for the maximum positive results against the minimized negative results. There could still be negative results, but through knowledge those negative results should be minimized into its maximum level. All these together is the knowledge.
4. **Constituted hidden knowledge:** The Constituted hidden knowledge shows that further there is the set hidden knowledge that should be used in due time and contextually. So, that is to be hidden unless and until the negative results come against to choke the positive results, where certain timely means and methods are used to resist and oppose the negatives to bring back only the positive in future.

MAN IS HIGHLY EVALUATED BEFORE THE ALIENS.

Above all the standards of Aliens and above the Angels in the universe, uniquely only in man is further concentrated his Personality being with the very powerful abstract components of intellect, emotion, will-power, mind, conscience and internal utterance. So man alone can exercise the four-stepped consciences such as **the Basic conscience** *against his brutality*; **the Gentile conscience** *against his carnality and gentile nature*; **the Subconscience** *against his omissions towards the fellow-beings*; and **the Root conscience** *against his omissions towards his coinciding with the universe and the set functions, being without any omissions in the universe.*

Further, if any man can exercise his power together with the exercising of the hitherto unravelled powers of the Matter universe, then he is with the **Universal conscience** *by his being plunged into the universe*. Subsequently, further if any man can exercise his power together with the functioning power of the Physical universe of time and space; then he is with **the Superconscience** *by his being plunged into the universe of time and space*, and subsequently further if any man can exercise his power together with the functioning power of the Metaphysical universe being behind the universe of time and space, then he is with **the Eternal conscience** *by his being plunged into the Metaphysical universe by from there his peeping into the different stages of Infinity*. Surely such a man will be becoming the **Man of the universe** with the Crown of the universe who is described in the Eastern Philosophy as the **PURUSHA** of the universe.

But woe unto the mankind while man is presently imprisoned in his biological life similar to every beast in its biological life. More than such a man, the lowest grade of Aliens are better in the interplanetary vision and the interplanetary look with their interplanetary travellings.

APPENDIX

THE VIEW OF THE ABSTRACT FACULTIES IN A CHART

I. THE ABSTRACT FACULTIES OF THE UNIVERSE

1. The root abstract faculties of the universe as the tap root of the universe

The never-endingly existing intellect, the never-endingly existing emotion, the never-endingly existing will-power, the never-endingly existing mind, the never-endingly existing conscience and the the never-endingly existing internal utterance that are for/in the Metaphysical universe. All these six components altogether collectively is the never-endingly existing personality in the Metaphysical universe.

[In philosophy this was the so-called Supreme Person.]

2. Due to the above-said six components that were working in the Metaphysical universe with its vacuum motions against the vacuum conflicts together is **the root abstract life**

[In philosophy this life-giving root pattern was the so-called Supreme Soul.]

3. The abstract faculties with the vehement motions of the waves throughout the whole universe which is the totality of the four layers of the universe

(i) The vehemently moving motions of the waves of the Constituted knowledge being hidden behind the Physical universe of time and space, so that these motions are in the Metaphysical universe which is the first and top layer of the universe

(ii) The vehemently moving motions of the waves of the Universal knowledge throughout the Universe of time that was once the Pre-nuclear stage of the universe which is the second layer of the universe

(iii) The vehemently moving motions of the Universal ideologies throughout the Physical universe of time and space as the third layer of the universe which space already got set and existed prior to the setting of the Matter universe in it and so prior to the setting of the stars and planets in it, and so prior to the allotments of the areas in the space in apt measurement to be destined for the rotation and revolution of each stellar system including each planet and so prior to the setting of the runway in the space for the stars and planets, and by leaving area-gaps between the stars and between the planets, for at any time to be without any clash between the different stars and the planets.

(iv) The vehemently moving motions of the waves of the Universal ideas throughout the 9/9 area of the universe including the Vacuum Gulfs in between without the stars and planets there, but only the darkness there, and including the Underworld where there are only the snatched away wandering stars circuiting uncircuitously without any proper orbits for their rotation and revolution.

[In philosophy these vehement motions altogether as the permanent four-angled life for the universe and in the universe is the so-called Universal Soul.]

II. The abstract faculties of the Man of the universe who is the Crown of the universe

For the receiving of the already mentioned total abstract faculties of the universe, the man who plunged into the totality of the universe, also is with the same abstract faculties of the universe as his abstract faculties in him, who then is the shareholder with the universe of all those root abstract faculties of the universe, and so he being the embodiment of all the abstract faculties of the universe by his receiving the personality of the universe as his personality too and the so-called soul of the universe as his soul too.

III. The abstract faculties of the universe in everyman on the earth in two steps

1. With the concentration of the Image personality in everyman which is with the image intellect, image emotion, image will-power, image mind, image conscience and image internal utterance, altogether in them as the six components of a personality for man
2. with the concentration of ideas as the image of the Universal ideas;
with the concentration of ideologies as the image of the Universal ideologies;
with the concentration of knowledge in him as the image of the Universal knowledge, and
with the concentration of hidden knowledge in him as the image of the Constituted knowledge behind the universe

IV. The abstract faculties of the universe in the Angels in one step

with the concentration of ideas in the angels as the image of the Universal ideas;
with the concentration of ideologies in the angels as the image of the Universal ideologies;
with the concentration of knowledge in the angels as the image of the Universal knowledge, and
with the concentration of hidden knowledge in the angels as the image of the Constituted knowledge behind the universe

V. The abstract faculties of the universe in the higher grade Aliens in only one step

with the concentration of ideas in the higher grade Aliens as the miniature of the Universal ideas;
with the concentration of ideologies in the higher grade Aliens as the miniature of the Universal ideologies;
with the concentration of knowledge in the higher grade Aliens as the miniature of the Universal knowledge, and
with the concentration of hidden knowledge in the higher grade Aliens as the miniature of the Constituted knowledge behind the universe.

VI. The medium grade Aliens have the ‘self’ or ‘darling’ from the Cosmic life.

1. The intermediate part is powerful in the Aliens till this medium grade Aliens through the concentration of the universal powers in them.
2. They are with the spoken language power of orderly set and grammatically used language.
3. They are with the Law of intellect with such a brain system.
4. They are with the exercising of rational power in their words and deeds.

VII. The lowest grade Aliens as the permanent beasts in the universe are only with the superanimal life from the product life or planet life

1. They are with the special capacity of speaking within, speaking externally, and speaking upon through the attitudes.
2. They are with the product life or planet life unlike the beasts on the earth.
3. They speak and convey similar to the moron and imbecile standard of mankind.
4. They are without the biological birth or biological death because they are not in biological life.

But none of the totally described above-said qualities are either in any ape or in any beast on the earth. So woe unto the mankind who similarise/ equalize/compare man with the beast on the earth, while man is with all the above-described total qualities in him as his part in addition to man being with the beast-life as his biological life.

M. T. Abraham (Abraham Mannil Thomas)
pen-named as The Man of the East
(The Discoverer-Author)
Fellow of Franklin Scientific Society, London
(Membership ID #XA34057)

**NB: A LIST OF THE SCHOLARLY AND SCIENTIFIC BOOKS WRITTEN BY
THE MAN OF THE EAST IS GIVEN ON THE NEXT PAGE**

THE SCHOLARLY AND SCIENTIFIC BOOKS WRITTEN BY THE MAN OF THE EAST

1. A message to the Seven Religions of Asia
2. **Global Constitution—world under one rule—in four volumes**
3. Earthquakes, Tsunamis, Hurricanes etc., nowadays continually happen. Why? It is because of the wrongly set and followed Mathematics of the flat earth and the wrongly going ideological attractive system of the planet earth.
4. New Anatomy and Superpsychology
5. Our exodus from Vedas to Sastras, finally with the Superintelligent Computer
6. **The Aliens — The Alien Beings throughout the universe**
7. Final Psychology from the East
8. Collective salvation of humanity
9. Astrophysics differently with new Mathematics evolved from the universe and the Astrophysical lives —The Eastern Wisdom.
10. **For the setting of The Superintelligent Computer**
11. **Origin of the ‘Universe Behind’ and of ‘Our Universe’**
12. The mystery and science of Incarnation
13. Distribution of Purushakar
14. A study of the depths of sin (Hamartiology)
15. **Newly discovered Astro-Digital Mathematics for a Digital world**
16. 350 Amazing Questions of Universal secrets and their Answers
17. The Only and True History of Man
18. Wisdom from the East reveals superior scientific facts to the globe
