

# THE DIAGRAMMATIC UNIVERSAL HISTORY FROM INFINITY

## 1. The darkness progressively was from upon the Infinity

The darkness slowly got progressed in the Infinity. So the turning of the stages of Infinity took place in each progression of darkness.

2. The Infinity state of the universe was firstly the Time-Deep [the Depth of the Time from the never-ending Past] with the progressive darkness

3. The Infinity state got ended up with its final state as the Vacuum-Deep, which was shapeless and formless. The Infinity state of the universe was finally the Vacuum-Deep which was shapeless and formless and an empty place, being with the thick darkness and such progressive energies of the darkness there.

4. When the never put-out light's separation energy passed into the shapeless and formless empty vacuum, then that got separated from the darkness and such a separation power of energy made the till-then shapeless and formless vacuum turn into the shape of circular form.

5. Such a circularly shaped vacuum, even before that shapening, firstly got filled up with the light that shined within the darkness, further after its circular shapening is filled up with the abstract aspects such as the Constituted hidden knowledge, Universal knowledge, Universal ideologies and Universal ideas of a planned and set Matter universe in four layers such as its Pre-nuclear stage → its Nuclear stage → its fiery stage → and its matter-becoming stage. And so finally there is the setting of the Matter universe that should exist forever in its collective rotation in the Circular Big Vacuum Universe (seen in the fourth point).

# THE SEVEN ENERGIES

## FROM SEVEN DIFFERENT STAGES OF THE UNIVERSE IN SEVEN DIFFERENT TIMES

### I. **The Universal Darkness Energy** in different ratios

— The Universal Darkness Energy started from when the Infinity started. The different progressive stages of Infinity are turned on account of the different Darkness Energies of the different ratios of darkness.

### II. **The Universal Light Energy** in different ratios

— The Universal Light Energy started for the circular turning to the till-then shapeless vacuum stage. As the result, there is the Circular Big Vacuum Universe. It is sure that the till-then unstructured vacuum is set in a circular shape through the spreading of the never put-out light and such a never put-out light's separation energy from the darkness in the vacuum.

### III. **The Universal Time Energy** is based on the never-endingly never-stopped motion of the ever-continuing timewaves. This is the surpassing Time Energy that can never be stopped nor ever be brought back.

— The Time power and its Time Energy started from the very beginning of the Pre-nuclear stage of the universe which is based on the filling up of the different waves of ideologies circularly through the passing of the controlling timewaves circularly.

### IV. **The Universal Voice Energy** is based on the bursting out of the already filled-up waves of ideologies—which were controlled by the timewaves—with the audible exposition of the **banging out of voice**. This is further moved with the universally echoing Voice Energy through a chain of voices in different types.

— As the result of Universal Voice Energy, here started the Nuclear stage of the universe of great booming voices, incredibly great power and

invincibly and exceedingly surpassing energy. This Nuclear stage continued for a very long time till it entered into a great conglomeration together with the neutral elements and thus with the emergence of the Nuclear Energy and the fiery stage.

**V. The Universal Nuclear Energy** while there was the great conglomeration of the universally spread neutral elements together with the above-said Nuclear stage of the universe through the cohesive motion of dual act of conflict and friction, where when the till-then dormant state of heat is passed with very extensively great fervent heat, then there was the greatest and Second nuclear explosion as the Nuclear Energy for the emergence of the unquenchably fiery stage of the universe for seven to eight crore years for the matter formation from the very beginning of the cooling down of the fiery stage.

**VI. The Universally Automatic tempestuous Whirlwind Energy**

— The automatic tempestuous Whirlwind Energy is automatically germinated from the gradual processes of the great burnings of the unquenchably fiery stage that automatically further worked in the midst of the slow cooling down of the fiery stage to transform that fiery stage automatically into the matter stage. Further such a Universally tempestuous revolving Whirlwind Energy and the Universal Magnetic power worked together for the setting of the Matter universe in the automatically set direction of the North Pole against the South Pole— all these altogether is the **Automatic set-up of creation** and its further setting as the Matter universe that further rotates and functions in the already set Circular Big Vacuum Universe and further seemingly functions automatically through the greatest attractive system of that Vacuum circle from its horizon area and through the gravitational force of the vacuum within.

## VII. The Sound Energy for the destruction very finally

Through the passing of the Sound Energy together with the passing of fervent heat if matter is turned into its reverse order of creation, even finally by splitting it into the elements and then into the atomic particles, there is great transformation in the present Proton, Electron, and Neutron, where the present Proton is become the Transformed Electron which is then together with the present Electron as the two Electron power, where the present Neutron is transformed into the Higher Proton to destroy the two Electron power,

So in this way of process of action through the Sound Energy, the present bombs can be defused. It is here clear that there can be destruction of matter and the Matter universe through the Sound Energy of great universal shout, if such Sound Energy is produced in any corner in any source.
