

*Science starts from the Metaphysical universe*

# **THE SECRETS FROM THE METAPHYSICAL UNIVERSE**

*[The secrets from the universe beyond the Physical universe]  
&*

*[There is no present universe without the Metaphysical universe].*

**THE METAPHYSICAL UNIVERSE** is the prior-set Vacuum universe circularly which is both as the prior-set runway of the Physical universe and as the prior-set vacuum area for the Matter universe to be hung there and to run in the gravitational force.

In addition to the above-said two prior values, the Metaphysical universe is the prior-set Vacuum universe circularly for the formation within it of the Physical universe in four layers such as:

- 1. THE PRE-NUCLEAR STAGE OF THE PHYSICAL UNIVERSE** that starts with division, split, friction, conflict and motion, further with the set horizon of the Physical universe as **the Time universe** with the filling up of the waves of ideologies there in their horizon motions circularly, and finally it ends up into the great bursting out of that filled-up waves of ideologies as the First Nuclear explosion.
- 2. THE NUCLEAR STAGE OF THE PHYSICAL UNIVERSE** that starts with the banging out of voice further in the spreading of seven types of Mighty voices as **the from-then Space universe** with the long while filling up of great booming voices with incredibly great power and invincibly and exceedingly surpassing energy, and that finally ends up into the Universe of neutral elements which is in the cohesive motion of ideas and actions at a time, where so there is the conflict between the knowledge of good and the knowledge of evil, and then as its derivative there is the friction between the positive and the negative universally through the exposed friction between the North pole and the South pole.

**3. THE UNIVERSAL OCEAN OF FIERY STAGE OF THE PHYSICAL UNIVERSE** that starts with the vehemently passing of the enormously great heat (about 35,000 fold heat of the heat in the sun) through the thickly concentrated state of the neutral elements with the result of the very great bursting out as the Second and very great Nuclear explosion through the-then emergence of the reverberating echoing of the nine types of Thundering voices universally and the further spreading of such an unquenchable fiery ocean (in about 4900 fold heat, light and energy of the heat, light and energy in the sun) in the Space with great velocity and motion through the-then emerged circularly moved whirlwind universally for the development and uttermost spreading of the fiery ocean in the Space.

**4. THE MATTER STAGE OF THE PHYSICAL UNIVERSE** that starts with the slow cooling down of the fiery stage of the universe. The fiery stage of the universe starts to be cooling down slowly with the emergence of Nine Musical voices universally, where the most precious stones and the best quality of diamonds came out at first from the cooling down fiery stage;

further the secondary standard of precious stones and diamonds came out secondly from the still continuing cooling down fiery stage;

still further the fine gold with the setting sun's look came out thirdly from the still more cooling down fiery stage,

and further the real and pure gold with the look of burned fine brass came out fourthly from the further more cooling down fiery stage.

Thus an enormously huge quantity of very precious matter is brought out for them to be firstly set as the very anciently formed very old area of the universe with the stars, though huge in size but less in number due to the use of more area of space for the orbits with their rotation and revolution. Moreover, they are more in brightness with the respective standards of planets around them.

Thus in the Universal history at first the two-third of the already set space here got filled up with the very bright stars and bright planets that are around such an each star totally as the firstly formed very old area of the universe in  $\frac{6}{9}$  area or in  $\frac{54}{81}$  area of the present Matter universe.

## **THE SETTING OF THE MATTER UNIVERSE ITSELF IS IN THREE STEPS.**

**Firstly there was the invisibly set Matter universe and then secondly, there was the visibly set Matter universe and then thirdly, underneath of this much total habitable area there was set the uninhabitable Underworld.**

If at first the two-third of the already set Space got filled up with the invisibly set Matter universe which was in  $\frac{6}{9}$  area or in  $\frac{54}{81}$  area of the present Matter universe,

the remaining one-third of the already set Space continued as the Space-Deep, being without the matter there, but only the darkness there. This Space-Deep is in  $\frac{27}{81}$  area of the present Matter universe.

This  $\frac{27}{81}$  area of Space-Deep got set as the area for the secondly done further creation there, as then the visibly set Matter universe.

Thus the visibly set Matter universe was created only in  $\frac{18}{81}$  area as the area to be used for setting the inhabitants there at first.

Here again the remaining  $\frac{1}{9}$  area or the  $\frac{9}{81}$  area of Space still continued as the Space-Deep.

4

In this finally remaining  $\frac{1}{9}$  area or  $\frac{9}{81}$  area of Space-Deep there was the creation of the Underworld in its one-third area, that is in  $\frac{3}{81}$  area as the area standing out of the darkness and in the darkness.

This limitedly created  $\frac{3}{81}$  area is still without the properly set attractive system which is based on the Cosmic light. Here in this darkness there are certain uncircuitously circuiting stars which are nothing but the snatched-away and brought- down wandering stars from the world Above.

The Cosmic light is not yet in this  $\frac{3}{81}$  created area in the Underworld due to the still remaining  $\frac{6}{81}$  area in the bottom part of the Underworld as the Space-Deep. This is practically the Bottomless Pit being with the thick and touchable darkness there.

## **THE MATTER UNIVERSE THAT OUGHT TO HAVE BEEN IN THE $\frac{81}{81}$ AREA OF THE SPACE**

**But in between, certain pockets of Space-Deep had been remaining and at the end a small portion of Space-Deep was remaining as such.**

The firstly happened creation was in the two-third area which is in  $\frac{6}{9}$  or  $\frac{54}{81}$  area,

where the one-third area remained as the still continuing Space-Deep which is in  $\frac{27}{81}$  area.

The secondly happened creation was in the  $\frac{18}{81}$  area,

where the  $\frac{1}{9}$  area or the  $\frac{9}{81}$  area remained as the still continuing Space-Deep.

The thirdly happened creation particularly for the Underworld was in  $\frac{3}{81}$  area from out of the darkness and in the darkness as the area being without the Cosmic light,

where the  $\frac{6}{81}$  area remained as the still continuing Space-Deep with thick and touchable darkness which is the Bottomless Pit.

## **DARKNESS AND LIGHT ARE THE VERY FIRSTLY SET NEGATIVE AND POSITIVE ASPECTS.**

**THE FIRSTLY VISIBLY SEEN NEGATIVE ASPECT IS THE DARKNESS AND ONLY AFTERWARDS THERE WAS THE LIGHT AS THE FIRSTLY VISIBLY SEEN POSITIVE ASPECT, WHICH ARE TOGETHER THE FIRST POSITIVE AGAINST THE FIRST NEGATIVE IN THE UNIVERSAL HISTORY.**

The firstly visibly seen negative aspect the darkness, was in motion and in action during the Infinity stage.

Through the developing of the darkness in the Infinity there was the turning of the Metaphysical universe from the Infinity, so that there was the resultant origin of the Metaphysical universe at the very end of the Infinity stage.

Yet the firstly visibly seen positive aspect the light, got spread only in the setting of the Metaphysical universe.

The firstly visibly seen negative aspect the darkness, that was in motion and in action from the Infinity stage was also in motion and in action at the ending stage of the formation and setting of the Matter universe for the creation of the uninhabitable Underworld which is being with the still remaining Space-Deep as the Bottomless Pit still now being with the thick and touchable darkness.

So the visibly seen darkness is in motion and in action for every stage and everywhere in the universe while the spread light is from the Metaphysical universe till the ending of the habitable Matter universe which is surely till upon the Underworld.

↺

↓

So it is sure that in every vacuum hole or in every vacuum gulf in the Space there permanently dwells the darkness, and so the darkness dwells in and on the multitude of waters in the oceans and finally the thick and touchable darkness permanently dwells in the Underworld where there are the snatched-away and brought-down wandering stars into their uncircuitously circuiting rotation with their being transformed with the blackness of darkness.

**THOUGH THE FIRSTLY VISIBLY SEEN DARKNESS  
IS THE ONLY DARKNESS YET THE LIGHT  
IS IN FIVE STEPS AND EVEN IN SEVEN STEPS.**

**The firstly visibly seen darkness from the Infinity is the only darkness for the universe as the Cosmic darkness down till the Underworld and even as the darkness that we experience now. But the only thing is that the same Cosmic darkness is in seven different ratios.**

↓

**BUT THE UNCEASING LIGHT IS IN FIVE DIFFERENT STEPS.**

The firstly visibly seen light from the Metaphysical universe is the Cosmic light.

↓

The Cosmic light from the Metaphysical universe is the reason for the excellent celestial luminosity that is spread in very distant areas of the Matter universe, and this Cosmic light is ever unceasing.

↓

There is the secondly visibly seen light as the light that got spread from the very ending state of the Universe of neutral elements.

↓

The origin of this secondly visibly seen light was from when the enormously very greatly fervent heat that was about 35,000 fold heat of the heat in the sun, was passed through the thickly concentrated neutral elements.

↓

Thus the secondly visibly seen light is about 4900 fold light (of the light in the sun) together with about 4900 fold heat and energy (of the heat and energy in the sun), which is of the gushed-out unquenchable fiery ocean formed as the result of the Second and very Great Nuclear explosion.

There is a border and a door in between as the door of the Cosmic light that separated the Cosmic light from the 4900 fold of the light from the enormously passed heat.

There is the thirdly visibly seen light as the 490 fold light which is the light from the universally passing issue of fiery stream that runs throughout the universe after the formation and setting of the Matter universe, being the main life of the Matter universe for the permanent existence of the Matter universe with that 490 fold light together with the 490 fold heat and energy of the stream of fiery issue.

There is the fourthly visibly seen light as the onefold light which is the light from each star where our star the sun has the onefold light seen in the sun together with the onefold heat and energy in the sun.

There is the fifthly visibly seen light as the 1/7 fold light which is the light from the Flame together with the 1/7 fold heat and energy emitted from the Flame, a particular fiery area in the universe.

The above-mentioned five-stepped lights are those which can never be ceased. They are the five lights that get spread and their light shines without stop and can never be extinguished at any time.

In addition to these five-stepped lights, along with the Sound Energy, there is the naturally exposed sixthly visibly seen light together with such a heat and energy, all the three of which can be hardly ceased, and that is only through the dissolution.

In addition to the above-said six permanent lights, there is the seventhly visibly seen light together with such heat and energy that can be ceased or stopped.

**THE LIGHT IS SPREAD CIRCULARLY WITH DOUBLE ACTION AT A TIME AS THE FIRST SCIENTIFIC ACTION, ONLY THROUGH WHICH THE METAPHYSICAL UNIVERSE WAS SET.**

**There is the proceeding of tremendously great power and energy in the dual action of the simultaneously happening advancing power of light and the retreating power of darkness.**

*This theory is exemplified by the natural phenomenon that we see in front of us through the tumult of the oceans with billows and waves that beat vehemently because of the emergence of energy through the advancing power of light and the retreating power of darkness simultaneously.*

The firstly visibly seen light, the positive aspect, is spread circularly against the firstly visibly seen negative aspect, the darkness, that had been in motion and in action during the infinity stage, at the end of which the Metaphysical universe was set. There in the setting of the Metaphysical universe when such a spreading of light, the positive aspect, got advanced circularly, simultaneously the darkness, the negative aspect, got retreated circularly. So there were two circularly happened actions at a time, both the advancing of the spreading of light circularly and the retreating of the existing darkness circularly. In such a circularly happened advancing and retreating of the light and the darkness respectively, great power and energy proceeded from that separation of light from the darkness.

At first through this dual action of the advancing power of light and the retreating power of darkness through the-there emerged energy there, the till-then unshaped Vacuum universe got shaped into the circular Vacuum universe by its being from then set circularly as the circularly set Metaphysical universe.

**There is the proceeding of tremendously great power and energy in the dual action of the simultaneously happening advancing power of light and the retreating power of darkness.**

*This theory is exemplified by the natural phenomenon that we see in front of us through the tumult of the oceans with billows and waves that beat vehemently because of the emergence of energy through the advancing power of the light and the retreating power of the darkness simultaneously.*

When this separation of darkness from light happens with the dual action of advancing of light upon the oceans, simultaneously there takes place the retreating of darkness upon the oceans. Then through the-there emerged power and energy, there works the above-said brooding superior lives of the oceans, that work permanently for the total area of oceans for its stirring up with great billows and waves as well as for the undercurrent of the oceans, while the ocean is set with a boundary and seal, even by the set seal to its underneath bottom part. So in this state, the ocean is alive always being without the stagnated state of the multitude of waters of the sea.

It is sure that from the Infinity, automatically the darkness dwells everywhere only as one darkness, but in different ratios. Through the removal of darkness by spreading the light, even through such a dual action of advancing of light and retreating of darkness, when both happen circularly, there arise the circular power and circular energy then with the resultant great scientific action of the circularly set the Metaphysical universe.

Through this kind of first scientific action, there got originated the circularly shaped Vacuum universe. Till then such a vacuum area was the unshaped Vacuum universe. But through this kind of first scientific action it was shaped circularly as the Circular Big Vacuum Universe.

## **SOME AMAZING SCIENTIFIC FACTS**

1. Both light and darkness move circularly.
2. So both light and darkness cover 14 fold area of one area of matter.
3. At the night time, the image sunlight can be established very imminently in 1/14 fold light of the light of the sunlight. Such a naturally lighting image sunlight is possible both in the ocean and on the land.
4. **Amazingly only the circular motions are there in the universe.**
  - (i) Both for the spreading of light and for the retreating of darkness there are circular motions.
  - (ii) For the running of time it runs circularly as well as for the motions of time waves they move circularly.

- (iii) For the waves of ideologies, they got filled up circularly through the horizon motions.
- (iv) All the neutral elements were moving circularly.
- (v) So the universe is set circularly, even with its stars and planets rotating and revolving circularly in their orbits. Though the Space is circular, yet the Matter universe is set in elliptical shape.

**Here the left-side '0' is valuable except in counting.**

So the beginning value of all these circular facts of the universe is 0 point which is the valuable 0 as the +0. Again this kind of circle ends in the same 0 point in 360° by then giving the double value for the same 0 point, as then  $\frac{0}{0}$ .
