

ELEVATED GENERAL SCIENCE WITH ELEVATED BIOSCIENCE

THE ABSTRACT SUPERIOR SCIENCE THAT SURPASSES
THE SCIENCE AND TECHNOLOGY OF THE ALIENS

**THE SECRETS OF LIVES
OF THE UNIVERSE AND OF MAN**

**THE SEVEN LIVES BEHIND, BEYOND, AND
ABOVE THE MATTER UNIVERSE**

I. LIFE OF COSMIC DARKNESS

The Cosmic darkness progressively got origin in the Infinity itself.

This Cosmic darkness, that began from the Abstract darkness and got developed in seven steps of its own ratios, is still remaining as the first and foremost life till down to the Underworld, while the Underworld stands out of the darkness and in the darkness. In this Underworld the Cosmic darkness is in transformation into the thick and terribly touchable darkness. The special feature of the Cosmic darkness is that it is the only one darkness in seven ratios as seven types of darknesses such as:

1. the abstract darkness

2. the twilight darkness

3. the visible darkness

4. the midnight darkness

5. the great depth's darkness

6. the thick darkness and

7. the terribly touchable darkness.

II. LIFE OF COSMIC LIGHT

The Cosmic light got origin at the tail end of the Infinity state, by that Cosmic light being spread in the Cosmic darkness as the spreading of such kind of very powerful light against the Cosmic darkness for its removal. Here there was the first friction that had ever been in the universal history, which was nothing but the first friction between the Cosmic darkness and the Cosmic light, when there took place the separation of the Cosmic light from the Cosmic darkness, where **there was the advancing power of light and simultaneously there was the retreating power of darkness. This friction was circular.** So through this circular friction of advancing power of Cosmic light, there spread the Cosmic light against the retreating power of the Cosmic darkness in the very enormous area, 14 times the area of the present Matter universe. Through this enormously separated Cosmic light that got separated from the Cosmic darkness in that enormous area, there was the formation of the Circular Big Vacuum Universe in 14 times the area of the Present universe. This is the Metaphysical universe in enormous area as the Vacuum universe, set prior to the Physical universe of time and space.

III. LIFE OF THE VACUUM MOTION AGAINST THE VACUUM CONFLICT

Further there were the vacuum motions that were in motion against the vacuum conflicts, as the vacuum motions against the vacuum conflicts that got origin in the Circular Big Vacuum Universe at its top/at its beginning. Here the vacuum motions that had been the firstly happened motions, were without any conflicts within. Yet those vacuum motions had conflict motions against the vacuum conflicts. Here there began the conflict motions as the vacuum motions against the vacuum conflicts, and it continued further for Alpha years (crore \times crore years). Finally at its depth, the first time wave came into being with new actions further for the actions and movements for the from-then developing of the Physical universe of time and space. Here is the Universal Mind with the vacuum motions against the vacuum conflicts within it [Our mind is the replica of this state, as our mind is with the vacuum motions against the vacuum conflicts].

IV. THE LIFE OUT OF THE FROM-ONE-TO-ANOTHER-CONTINUING FIVE ACTIONS WITHIN HALF A SECOND

With the first time wave, there was the divided knowledge of good and evil as the divided conflict between the knowledge of good against the knowledge of evil. So here during the span of this first time wave of half a second, there took place **division, split, friction, conflict** and **motion** as the five continuous actions within half a second for the basic function of both the psychological life in the realm of abstract lives and the physical life in the Physical universe of matter. So based on these five continuous actions within a time wave of half a second, all the actions started both for the life of the Physical universe of time and space and for the psychological lives of all the abstract Beings who are in it with their language voice and rationality. So with these five actions within the time wave of half a second, there is the common life system applicable for both the abstract lives and the physical lives. So in this point the abstract lives and the physical lives are related to each other. **Thus the deepest Psychology and the Superior Astrophysics are related to each other.** Here is the Universal Psyche with these five actions within half a second [Our psyche is the replica of the Universal Psyche even with these five actions within half a second in us].

V. LIFE OF THE HORIZON MOTION

By the development of the multi-waves of ideologies through the never-ending circular movements of the further multi-trillions of time waves, ultimately there was the set horizon of the Physical universe of time and space. Here within these boundaries of the set horizon, there got filled up the waves of ideologies till its bursting out from its completed and filled-up state [But that bursting out took place with the banging out of voice only after thousands of crore years]. Because of the movements of time waves circularly, the together-moving waves of ideologies also got moved circularly as the horizon motion of life within the Physical universe of time and space. **So the time and space relationship is proved through the circular motion.**

VI. VOICE LIFE OUT OF THE FIRST NUCLEAR EXPLOSION

Together with the circularly moving multi-trillions of time waves, when the together-moving multi-trillions of the waves of ideologies got completed and filled up over a duration of thousands of crore years, there took place a great bursting out as the **First nuclear explosion** with the result of the banging out of voice, further with the echoing of the seven types of Mighty voices continuously. This is the voice life of the Great Creative voice Logos and the controlling life of the Space, so that this controlling life of the Space works as the pulling-up life from behind of the Matter universe (which is to be created in the future and to be set in the Space) to pull it up and make steady the Matter universe into the already set Space.

VII. LIFE OF THE SPACE WHILE THERE WAS NO MATTER UNIVERSE IN IT [*THE MATTER UNIVERSE OUGHT TO BE SET IN THE SPACE*].

From the above-said Great Creative voice Logos, there were proceeding the great booming voices with its incredibly great power and invincibly and exceedingly surpassing energies that were filling up continuously for a long while of a few hundred crore years resulting in the lives of neutral elements in their cohesive motion of ideas **from behind and actions in exposition visibly, audibly and tangibly**. Consequently and subsequently, there were the visibly flashing brightest and best amber lightnings unceasingly, and the audibly reverberating echoings exceedingly without any stop, and tangibly the all-round revolving shakings. These are the visible expositions of the neutral elements.

Thus herewith there are the seven prior lives till the neutral elements as the seven lives behind, beyond and above the Matter universe.

THE STORY OF THE UNIVERSE CHANGES THE SCIENCE TILL NOW.

**FROM THE ABSTRACT REALM FINALLY
THE MATTER UNIVERSE CAME OUT.**

SO THERE ARE SEVEN PRIOR STAGES TO THE MATTER UNIVERSE.

In the never-ending Ages of the past, we should see the-then stage of nothingness everywhere. But in that nothingness in an abstract level there was the Great Creation Power in motion in all those never-ending Ages of the past for the purpose of creation.

As the first stage that began for the universe there was the Infinity state, where the already existing Great Creation Power in motion was in the point of action for creation where the abstract qualities of the Great Creation Power got projected as omnipotence, omniscience and omnipresence. From this stage the different progressive Ages of Infinity got advanced together with the progression of the ratios of darkness. But the never-measured never-ending Ages of the past surpassed everything as the Time-Deep. In that Time-Deep the darkness that had progressed got shadowed an image of the Vacuum universe. In the course of passing of Ages further through the acuteness of darkness that image of the Vacuum universe became an unshaped Vacuum universe of great darkness.

As the second stage that began for the universe there was the proceeding of great luminous light circularly from the Great Creation Power. Because of such an advancing of the circularly progressing light, the till-then darkness got retreated in the same path by vanishing circularly. Here the first conflict took place between the light and the darkness as the conflict arisen there through the retreating of darkness against the advancing of light, and thus through the circularly progressing light the till-then unshaped stage of the darkened Vacuum universe was transformed into the set circularly having progressed Vacuum universe of great light.

The third stage begun for the universe, was with the vacuum motions against the vacuum conflicts in the already set Circular Big Vacuum Universe of great luminous light.

After crore × crore years or after Alpha years, the fourth stage of the universe began for the Universe of time and space where time got prominence through the time waves as the first waves, while through these never-endingly non-stop motions of these first time waves innumerable waves got proceeded circularly where such a circular system was projected as the horizon of the universe, and within those horizon boundaries all those waves got filled up like the filling up of water fully in a bottle.

After much more than a thousand crore years of the filling up of different waves of ideas, different waves of ideologies, different waves of knowledge and different waves of hidden knowledge, the fifth stage of the universe was begun through the First nuclear explosion as the great bursting out of the filled-up waves of ideologies with the-then exposition of the banging out of voice at first in the universe. **This resulted in the echoings of the Seven Mighty voices for the setting of the Space based on the filled-up great and mighty booming voices, incredibly great power and invincibly and exceedingly surpassing energy that are constituted as the Space to involve the neutral elements in such a Space for the future formation of the Matter universe through different processes of creation.**

After hundreds of crore years of the filling up of great booming voices with its incredibly great power and invincibly and exceedingly surpassing reverberating energies continuously, there was the sixth turning of the universe as the Universe of neutral elements that got filled up in the Space for the further passing of enormously fervent heat with its enormously great power to transform it into the fiery stage of the universe, for which here there was the greatest Second nuclear explosion through the bursting out of the very thickly concentrated state of the neutral elements by passing the enormously fervent heat through that very thickly concentrated state of the neutral elements, where through the emergence of the greatest energy there also proceeded the Nine Thundering noises, in addition to the Seven Mighty voices that previously proceeded. **While the Seven Mighty voices are upholding the Matter universe to be created thereafter in the Space, the Nine Thundering voices dwell within the Matter universe like the veins that are seen in a decayed leaf.**

Seventhly, there is the Universal ocean of unquenchable fiery stage of the universe for bringing out huge quantities of matter from the cooled and condensed fiery stage and thus for setting the Matter universe in the Space.

COSMIC LIFE IS THE LIFE OF BOTH THE MATTER UNIVERSE AND THE SPACE IN WHICH THE MATTER UNIVERSE IS CONTAINED

[COSMIC LIFE IS THE LIFE OF THE MATTER UNIVERSE IN LINK WITH THE LIFE OF THE SPACE, WHERE THE MATTER UNIVERSE IS FITTED].

COSMOS IS BOTH THE MATTER UNIVERSE AND THE SPACE
[The liquid can be measured only with the container that contains it].

If the life of the Space emerged from the Great Creative voice Logos—which was in exposition by the banging out of voice—and the further steps from the great booming voices with its incredibly great power and invincibly and exceedingly surpassing energy which are all the Cause for the mixed state of **Space being with the neutral elements in it**, on the other hand the bringing out of the Matter universe is through the enormously passing of three steps of heat, where the neutral elements of the Space was the Medium for the passing of the heat.

When we segregate the Matter universe from the Space, the Space is the already prepared universal area to involve the Matter universe in it by involving the stars and planets in their orbits in the set and enough-arranged distance for each star with its planets to rotate and revolve in their respective orbits in the Space that are in the already arranged enough distance without any clash with each other. The Matter universe as one body alone is not meaningful enough, but the Matter universe means all the stars and planets and all the satellites. But now the Matter universe and the Space universe are inseparable as the ‘One Cosmos’ or the ‘One Universe,’ where there is enough space and enough gaps in between in the Space, with which all the many crores × crores of stars and planets are in their rotation and revolution in their own orbits in the Space without any clash.

Surely there is the life through the by-and-by origin of everything of ‘One Cosmos’ and again the life through the function of the Matter universe in the Space, together as the Cosmic life.

Here it is to be very much clarified that the process of creation [the process of formation] and the setting of the Space—begin from the emergence of the Great Creative voice Logos through the banging out of voice—together with the further process of creation of the Matter universe—through the passing of the three steps of heat—if altogether is the Root life of the Cosmos [the Root Cosmic life], apart from this life through the function of the Matter universe in the Space there arises the additional life of the Cosmos which is the Additional Cosmic life.

The main life of the Space is the life of the Great Creative voice Logos in seven steps. But the main life only of the Matter universe is the greatly and enormously passed fervent heat that is about 35,000 times the heat in the sun that passed for the dissolution of the very thickly concentrated neutral elements of the already existing Space.

Further, about 4,900 times the heat, light and energy in the sun was in great action in the universally filled-up Universal ocean of unquenchable fire which was further in tremendous development through the fabulously great velocity and motion, and thus through the gradual cooling down of it the Matter universe came into being.

As a matter of fact, about 490 times the heat, light and energy in the sun is permanently remaining in the already created Matter universe as the life of it, which is the permanent life of the present Matter universe.

Now when the Space and the Matter universe are made inseparably interrelated as 'One Cosmos' or 'One Universe,' the Great Creative voice Logos is the topmost Cosmic life in the seven steps of the Mighty voices. Further there are the Cosmic Thundering noises in nine steps and still further the Cosmic Musical voices in nine steps.

THE EMERGENCE OF THE SEVEN MIGHTY VOICES, THE NINE COSMIC THUNDERING NOISES AND THE NINE COSMIC MUSICAL VOICES IN THE THREE TIMES' TURNINGS OF THE UNIVERSE

The emergence of the Great Creative voice Logos with the seven steps of Mighty voices as the topmost Cosmic life was through the First nuclear explosion with the banging out of voice that further turned into these Seven Mighty voices **in the Spaceless state itself** for further the setting of the Space.

The emergence of the Nine Cosmic Thundering noises was through the still greater Second nuclear explosion as the outcome of the passing of the greatly and enormously fervent heat (35,000 times the heat in the sun) for the dissolution of the very thickly concentrated state of the neutral elements of the Space with the outcome of the gushing out of the Universal ocean of unquenchable fire which is from then in its great velocity and motion in the already existing Space that has been set before that time.

The emergence of the enormously proceeded Nine Cosmic Musical noises was through the proceeding steps of cooling down, even together with those proceeding steps of cooling down of the universally spread fiery stage gradually into the state of the enormous quantity of matter with the from-then concealed state of those Cosmic Musical voices in the matter that got emerged unitedly as the Matter universe.

The Cosmic life is of the three-stepped voices in relation to the three-stepped heat.

Here the main factor is the Great Creative voice Logos in seven steps that controlled the passing of about 35,000 fold heat for the dissolution of the thickly concentrated neutral elements and further for the formation of the different steps of matter through the gradual cooling down of the Universally spread fiery ocean in different ratios, finally as the Matter universe. And further that Great Creative voice Logos became the upholding factor of the Matter universe after its formation.

The first subsidiary factor is the Cosmic Thundering noises in nine steps that controlled the setting of the Matter universe through the 4,900 times the heat, light and energy in the sun. And further those Nine Thundering noises are remaining as the bones and veins of the Matter universe after its formation.

The second subsidiary factor is the Universal level Musical voices in nine stages that are related to the 490 times the heat, light and energy in the sun, as the finally remaining life of the already formed and set Matter universe. For such a final setting of the Matter universe, the Nine Cosmic Musical voices were the helping factors. And further that Nine Cosmic Musical voices are concealed in the different formed matters.

THE TRIBUTARY LIVES TO THE COSMIC LIFE

1. The cohesive motion of ideas and actions at the same time is through both the already existing conflict between the knowledge of good and the knowledge of evil and the newly derived friction between the positive and the negative. This friction of positive and negative got emerged from the conflict between the knowledge of good and the knowledge of evil as its derivative.

2. The positive and negative friction caused the Universal level friction and conflict between the North Pole and the South Pole that helped in all the ways for the permanent setting and function and for the permanent existence of the universe by centering on the North Pole.
3. Together with the positive-negative friction and also together with the Universal level friction and conflict between the North Pole and the South Pole when the Universally revolving whirlwind got emerged, that Universally revolving whirlwind caused the motion of lives everywhere in the universe.
4. Together with the Universal level friction and conflict between the North Pole and the South Pole and also together with the resultant Universally revolving whirlwind, when the Universally working attractive magnetic system got emerged, that Universally working attractive magnetic system and the resultant Universally attractive magnetic power together with its resultant life pattern worked for the spreading of certain ratio of pieces of matter as stars and further as planets and thus was the setting of the Matter universe, finally into its functioning state with the rotation and revolution of each star and planet in their respective orbits.

THE TRIBUTARY LIVES ARE DERIVED AUTOMATICALLY ONE AFTER ANOTHER BECAUSE HERE THE JUST PREVIOUS ACTION BECOMES THE CAUSE FOR THE VERY NEXT ACTION.

The basic reason is the cohesive motion of ideas and actions at the same time through both the already existing conflict between the knowledge of good and the knowledge of evil and the derived friction between the positive and the negative as the derivative of the previous ideological conflict.

1. The friction of positive and negative got emerged from the conflict between the knowledge of good and the knowledge of evil as its derivative. And that derivative, the friction of positive and negative became the main factor for the further steps of formation of the Matter universe.

2. The positive and negative friction further caused the Universal level friction and conflict between the North Pole and the South Pole. And that Universal level friction and conflict between the North Pole and the South Pole became the main factor for the setting of the Matter universe in different steps.

3. Together with both the positive and negative friction and the Universal level friction and conflict between the North Pole and the South Pole, further the Universally revolving whirlwind got emerged. And that Universally revolving whirlwind became the main factor for the motion of lives everywhere.

4. The Universally revolving whirlwind caused the motion of lives everywhere in the universe. And that motion of lives everywhere in the universe became the main factor for the Universally working attractive magnetic system.

5. Because of the Universal level friction and conflict between the North Pole and the South Pole together with the resultant Universally revolving whirlwind as the cause of the motions of lives everywhere in the universe, when there got emerged the Universally working attractive magnetic system, the Universally attractive magnetic power proceeded, from which further the life patterns got derived for the Material attractive system.

6. Through this much evolved processes of life patterns for the Material attractive system, there was the spreading of the already made pieces of matter as the stars and further as the planets in the already remaining vacant Space to involve those stars and planets in it, altogether being the set Matter universe.

7. Finally the set Matter universe through this much above-said processes got the rotation and revolution of each star and planet in their respective orbits, where it also got its pattern of collective rotation and revolution of that Matter universe by its centering on the gravitational force of the vacuum of the Circular Big Vacuum Universe.

THE COSMIC LIFE OF THE MATTER UNIVERSE IS STILL BELOW THE SEVEN LIVES THAT ARE BEHIND, BEYOND AND ABOVE THE MATTER UNIVERSE.

THE COSMIC LIFE IS THE COLLECTIVE LIFE OF THE MATTER UNIVERSE.

There are the in and around and concealed Cosmic lives of the Matter universe and those lives are also the reason for the Matter universe and then for the existence of the Matter universe.

1. The Cosmic life that is contained in the Matter universe
2. The Cosmic life that is always concealed in the Matter universe and
3. The Cosmic life that is in the Space around the Matter universe

Firstly these Cosmic lives worked for the Matter universe as the reason for the Matter universe.

Secondly, these Cosmic lives act for the existence of the Matter universe by keeping the Matter universe alive.

Because of the about 35,000 times the sun's heat that passed through the very thickly concentrated state of the neutral elements, there took place the Second

and greater nuclear explosion with the-then echoed and exposed Nine Thundering noises universally and there was the gushing out of the unquenchable fiery ocean, whose heat with light and with energy was 4,900 times the heat, light and energy in the sun.

This gushed-out unquenchable fiery ocean together with the Universally echoing Nine Thundering noises got spread in great velocity and motion, for which the already proceeded revolving whirlwind was in its catalytic revolutions, so that the unquenchable fiery ocean got spread universally in the same 4,900 times the heat, light and energy in the sun for the coming into being of that universally covered ocean of unquenchable fire as the Universal ocean of unquenchable fire that entered into its further proceedings.

In the place of the cohesive motion of the earlier stage of the neutral elements where there were **conflict in ideas** and **friction in actions**, there were used mainly the actions through the positive and negative friction, which universally resulted into the friction and conflict between the North Pole and the South Pole of the universe. This friction of South against the North, that is between the South Pole and the North Pole is half a part of the earlier cohesive motion.

THE THREE ROOT ENERGIES

- I. The Great Creation Energy that was together with the Great Creation Power was in about 35,000 times the heat in the sun, but it was in dormant state till the formation started for the Matter universe. But for the starting of the formation of the Matter universe, from its dormant state the Great Creation Energy in about 35,000 times the heat in the sun got into its exposition by its being passed through the neutral elements.
- II. Further from when the Universal ocean of unquenchable fire gushed out, it had 4,900 times the heat, light and energy in the sun. The same 4,900 fold heat, light and energy continued for the formation of the Matter universe.

III. But after the formation and setting of the Matter universe through the setting of its stars and planets in their orbits with their rotation and revolution, there is the permanent 490 times the heat, light and energy in the sun as the permanent heat, light and energy of the Cosmic life and that 490 fold heat, light and energy is the stream that runs throughout the universe for the permanent existence of the Matter universe through its Cosmic life of this much heat, light and energy always. This is now the present Cosmic heat and the present Cosmic light and the present Cosmic energy together the **Cosmic life** for the permanent existence of the Matter universe by keeping the Matter universe alive.

Here there is the set Cosmic life

1. The secondary Great Creative voice Logos that had emerged in the Second and greater nuclear explosion as the Nine Thundering noises are always concealed in the Matter universe like the veins of a leaf.
2. The half a portion of the cohesive motion as the friction of the South Pole against the North Pole is in its vigorous friction for all the further actions.
3. Through the emergence of the Universally revolving enormous whirlwind, there is the Universal power of very greatly speedy velocity and motion.
4. The Universally attractive magnetic power is concealed everywhere.
5. The Universal level Nine Musical echoing voices accelerated the cooling down into the great and enormous quantity of different types of matters and further such Musical echoing voices are concealed in the matter.
6. The together-state of the three lives of Nine Thundering noises, the Universally revolving whirlwind and the Universal magnetic power worked together for dividing and setting the greatly and enormously produced huge quantity of matter into various types of stars and planets according to their placements in their respective orbits as their being set for their rotation and revolution in the Space.

7. The permanent rotation of the Matter universe through its stars running after the finally remaining 490 fold heat, light and energy which is composed of the fiery stream of Cosmic life, Cosmic light and Cosmic energy towards which the stars are revolving.

THE SEVEN GENERAL LIVES OF THE UNIVERSE IN RELATION TO THE EARTH

1. THE LIFE OF DARKNESS

2. THE LIFE OF LIGHT

3. THE PLANET LIFE

4. THE GROUND LIFE

5. THE BOTANICAL LIVES

6. THE ZOOLOGICAL LIVES, AND

7. THE AQUATIC LIFE.

1. The first life in the universe is nothing but the **life of darkness**.
2. But the foremost **life** in the universe is **of light** that could shine in darkness and so spread over against darkness.
3. The **Planet life** is the part of the Cosmic life as the life of the Nine Thundering noises, that dwells within the planet as the veins that dwell in a leaf.
4. The **Ground life** is concealed with the Sound Energy and that Sound Energy also dwells upon the atmosphere as the guardian aspect of the life system of the earth. This Sound Energy is the derivative aspect from the Cosmic life.
5. The **Botanical lives** are from the atmospheric lives which consist of fire, air, wind, elements, gases, cloud with vapour of smoke and water, on all of which as the guardian life the Sound Energy broods.
6. The **Zoological lives** are from the concentrated state of the atmospheric life as the amoebic life in brooding, and it is further developing in link together with the ground life for the plasmic life. Because the ground life is of the Sound Energy, the spark-part of Sound Energy dwells in every zoological Being which is being with the plasmic life. Because such a spark-part of Sound Energy dwells, the wonderfully seen and heard instincts are in every zoological Being which has the plasmic life. In the zoological lives themselves there are three divisions as the creatures on the ground, the birds in the air and the beings in the water. **These three divisions are in link with the terrestrial, aerial and marine lives of the earth.**
7. **The unique aquatic lives**

The aquatic lives are the concentrated state from the life of darkness in the water, and that aquatic life is in friction through the life of light that is separating from darkness upon the waters. Here the plasmic life of the aquatic beings is in link with the underneath ground life of the oceans.

THE LIFE

The Abstract aspects of the universe

— the abstract life only in man

The Sound Energy *as a derivative from the Cosmic life*

— the superior brooding life as 'instincts' only in the multicellular creatures with plasmic life

The Atmosphere

— the heat, light and energy as the main factors for any life

The Atmospheric life in seven components

— the life both for botanical life and zoological life

The Atmospheric life in its concentrated state

— as the amoebic life particularly for the zoological Beings

The Plasmic life

— as the concentrated state of the ground life, either the concentrated state of the ground of the earth or the concentrated state of the underneath land of the oceans

The Basic life is the same

— with the same breath and the same fate both for man and beast.

LIFE IS FROM THE ATMOSPHERE AND FROM THE ABSTRACT ASPECTS.

What makes a motor vehicle to be in its action and in its motion, seemingly appearing to have a kind of life in it? Surely, it is because of the fact that an inanimate object is given an artificial life system in it based on heat, light and energy, and thus such an object is made to be in motion.

But in the zoological lives, the creatures are given the animate life system naturally through the atmosphere which comprises heat, light and energy. The basic aspects for life, whether in the zoological life or in the botanical life or even in the artificially given life in any object are heat, light and energy. For the zoological life and for the botanical life, their basic aspects of life, the heat, light and energy, come from the sun. Further its own life of plants and animals is from the atmospheric life which includes fire, wind, air, gases, elements, clouds with vapour of smoke, and water. Here heat, light and energy are dwelling externally for the naturally set life system. Again, the factors such as fire, wind, air, gases, elements, clouds with vapour of smoke, and water are dwelling internally in their concentration for the naturally set life system. The botanical life is also set naturally in the same pattern. Nevertheless in the botanical life the factors such as fire, wind, air, gases, elements, clouds with vapour of smoke, and water are not in their concentration, but are just as they are in the atmosphere. So the main difference of the zoological life from the botanical life is that in the zoological life the seven atmospheric life-giving factors are in a concentrated state as the amoebic life. But for the botanical life, it depends on these seven life-giving factors as their lives in link with the atmosphere, in addition to the externally dwelling heat, light and energy from the sun.

Above and beyond both these life patterns for the zoological life and the botanical life, the **Sound Energy is the God-particle** for both the zoological life and the botanical life because the Sound Energy is the derivative of the Great Creative voice Logos which is the main part of the Cosmic life. Again, that Great Creative voice Logos is the main part of the existence of the Matter universe in the

Space because the Great Creative voice Logos is the link between the Matter universe and the Space in which the Matter universe is evolved. Moreover, the first subsidiary part of the Great Creative voice Logos is dwelling in the Matter universe as its bones and veins and the second subsidiary part of the Great Creative voice Logos is concealed in the Matter universe. But the Sound Energy is below the Great Creative voice Logos and below its two subsidiary parts, because the Sound Energy is only as the derivative of the Great Creative voice Logos, where the atmosphere is still below the Sound Energy. Further the atmospheric lives are still below the atmosphere, either as the zoological life through the concentration of the atmospheric lives or as the botanical life without such a concentrated state of the atmospheric lives.

1. **The Great Creative voice Logos** is the link between the Matter universe and the Space.

2. **The first subsidiary part of the Great Creative voice Logos** after the formation of the Matter universe is dwelling in that created Matter universe as its bones and veins.

3. **The second subsidiary part of the Great Creative voice Logos** is concealed in the Matter universe which is revived or quickened as the Universal Musical voices.

4. **The Sound Energy** is still below the Great Creative voice Logos and its two subsidiary aspects by the Sound Energy having been derived from the Great Creative voice Logos only as its derivative.

5. **The atmosphere** is still below the Sound Energy, as the dependant of the Sound Energy.

6. **The atmospheric lives** are still below the atmosphere as the dependants of both the atmosphere and the Sound Energy.

7. By the atmospheric lives **the botanical lives** work by their being the dependants of the atmospheric lives.

8. When the amoebic life, that is the concentrated state of the atmospheric lives, dwells in the plasmic life it is **the zoological life**. The plasmic life as the external part of the zoological life is from the ground life which is in link with the Sound Energy, because the Sound Energy dwells in the ground for giving life to the ground. Thus the ground life is set through the Sound Energy.

This sentence in a chart form

The zoological life

1. The amoebic life is the concentrated state of the atmospheric lives.
2. When that amoebic life is dwelling in the plasmic life then that is the zoological life of any creature.

Plasmic life as the external part of the zoological life

1. The plasmic life is from nowhere but from the ground life.
2. The ground life is in link with the Sound Energy.
3. This is because the Sound Energy dwells in the ground for giving life to the ground.
4. Thus the ground life is set through the Sound Energy.

The spark-part of the Sound Energy is dwelling in all the multicellular organisms as **the Superior brooding life** in every creature that is with the plasmic life which is in link with the ground life. So this Superior brooding life, as the spark-part of the Sound Energy that dwells in every creature, works wonderfully and miraculously as **the instincts**. It is a fact that the mankind is amazed at these natural instincts automatically expressed by the living creatures. So man cannot apprehend and comprehend the wisely done nest making of the birds, the parental care exhibited by all types of living creatures and the international and intercontinental mass migration and movements of birds, fishes etc.
