

HUMAN DEATH SCIENTIFICALLY

The lives that leave man at his death, scientifically

When a man enters into his bodily death or physical death it brings about an end to his life on this earth. Concerning the beast life as the biological life in him, as what happens when the beast dies, for him also happen clinical death and molecular death. Then the dead body decomposes and merges into the soil.

But there are also some other deaths in any man, beyond a beast in its death.

That is explained as: In the death of man from him are dead and gone the friction of his thinking, his utterings within, his utterings externally and his attitudes. These capacities of the planet life of the earth in man are through the meeting together of the planet life and the ground life in everyman and finally they merge back to the planet life of this planet earth. That is to say, the above-mentioned capacities of the special life of man from the planet earth such as the friction of thinking, utterings within, utterings externally and attitudes will all join back respectively to the friction of thinking, utterings within, utterings externally and attitudes of the planet life of the earth.

Beyond the above-mentioned joining back, the rational life and rational power that are in man are dead and gone at the time of everyman's death and further such a rational life and rational power of man join back to the rational power of the universe. That is again to say, the spark-part of the rational power of the universe [due to the attractive system of the Physical universe of matter] indwelling in everyman as his rational life and rational power in him throughout his life makes his man of figure as the part of the Matter universe.

Above all the above-mentioned matters, the spoken language life in all men as the orderly set and grammatically spoken language life for the speaking and communication of man, when any man dies will go from him and further such a spoken language life with speaking and communication of man that departs from

man merges with the Universal language life that is brooding upon the Matter universe as the subsidiary part of the Cosmic voice. Finally, it is again to say that the spark-part of the Universal language (that is brooding upon the Matter universe) is concentrated in man as his spoken language life throughout his life making man of voice as the one beyond the Matter universe.

THE MAN OF FIGURE AND ITS ABOVE-MENTIONED POWERFUL LIVES ARE MADE FINISHED ON THIS EARTH ITSELF THROUGH ONE'S PHYSICAL DEATH.

1. In the physical death of man, **as the first action** there is the separation from each other of the animal life (biological life) that covers the Man of figure and the figure-form of the Man of figure as the-then become dead body. In this action of dividing it into two, at first the biological life (animal life) is poured out into the earth where such an animal life (biological life) is merged into the atmospheric lives. This action of death is surely similar to the only one life of every animal merging back to the atmospheric lives. So this first action of human death is common with the beast in its death.
2. After this first action, **as the second action** the remaining aspect of the Man of figure as the figure-form decomposes and merges into the soil as the dead body. This remaining human figure-form is without the biological life (beast life) covering on it. So from then his figure-form is cooled down from the heat of blood circulation of the biological life. Because this remaining human figure-form being without the biological life is the dead body.
3. **As the third action**, from his human figure-form the planet life gets death from him. So from him are dead and gone the friction of his thinking, his utterings within, his utterings externally and his attitudes which are the spark-parts of the planet life, that are in him.

4. **As the fourth action**, from his human figure-form the superior life of the Matter universe gets death from him. So from him are dead and gone the rational power and rational life of him which are the spark-parts of the superior life of the Matter universe, that are in him.
5. **As the fifth action**, from his human figure-form the language voice life [of the Matter universe even it broods always beyond the Matter universe] gets death from him. So from him is dead and gone the spoken language life as the orderly set and grammatically spoken language life.

THE ETHICAL ASPECT BEHIND THIS NEW DISCOVERY OF THE SCIENTIFIC ASPECTS OF HUMAN DEATH.

*This is the ethical aspect exclusively behind
the physical death of man.*

When man loses his conscience in all his dealings he loses his light that is in him by birth where the gross darkness begins to dwell in his body in great density. Here the ratio of density of such gross darkness is in accordance with his backsliding life. Such a backslidden brutal mankind is affected by deadly disease/deadly diseases in addition to the general sicknesses.

Besides the diseases for the backslidden brutal mankind the friction of thinking that is in such a man from the planet life decreases very much and so in the state of the capacities of special life from the planet life such as utterings within, utterings externally and attitudes, he will go on being exposed as a man of some great loss in him.

In addition to all these deteriorations in his rational power and rational life he will turn out to be very feeble and weak. So the discernment of what is best and excellent comes to cease in him and there germinates in him a nature of making evil as good for him.

Through his spoken language life all the above-mentioned states can be observed, heard and understood.

Though he has the experience of he himself not knowing ethically that he is going on as a person who got ruined and lost everything, yet still in the light of his earlier experience he can expose himself again as an honourable man.

Here comes the Psychology of man *[The reading of the mind of man].*

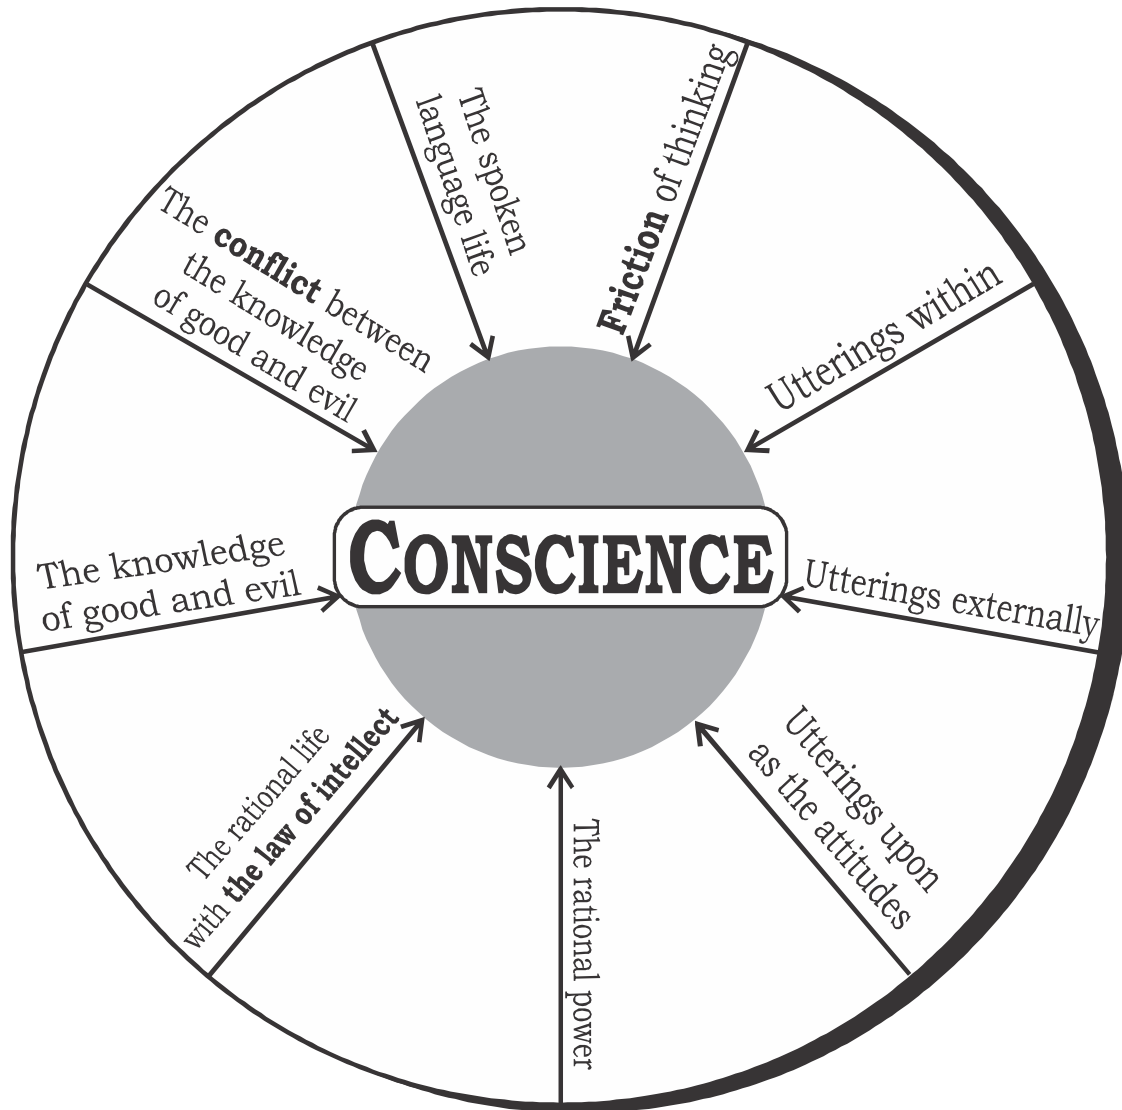

The conscience is the central point of Psychology of man while the working of the Conscience Law in man is for his keeping the moral and ethical life. Here come more psychical functions in him as the bit and bridle of his life for maintaining his life pattern and so as a good man in his family and in his society and in public.

When a man is with dead conscience then there is no much psychical functions in him other than almost the same common Psychology found in all men who are with the dead conscience and **who are without mental soundness.**

The reasons for Psychology in man

1. The conscience is the main reason as the central point of Psychology.
2. The friction of thinking is the basic reason for Psychology.
3. The utterings within are another reason for Psychology.
4. The utterings externally are still another reason for Psychology.
5. The utterings upon a man projected on him as the attitudes are the reason for Psychology in projection.
6. The rational power in man is another reason for Psychology in projection.
7. The rational life in man with the law of intellect is the reason for Psychology of man against any irrational Being.
8. The knowledge of good and evil in man is the root of psychical reading in man based on the conflict.
9. The conflict between the knowledge of good and the knowledge of evil is the reason for the split personality.
10. The spoken language life is the medium for Psychology.

**CONSCIENCE is the central point of the Psychology
for the reading of the mind of man.**

It cannot but be said that the Psychology of man is related to his living on this earth. So the Psychology of man is also dead and gone from man at his entering into his bodily death and his separation from the living of this world.
