

THE EVOLUTIONARY HISTORY OF THE UNIVERSE

THE AUTOMATIC SET-UP OF CREATION THEORY IS APPLICABLE HERE

**[This is a challenge to the hitherto known theories
of the Origin of the universe].**

INTRODUCTION

THE HISTORY OF THE MOTHER UNIVERSE WHEN TURNED AS A NARRATION

[The scientific history as a scientific story]

There were the never-endingly everpast ages of the innumerable and uncountable ages being without a beginning. Together with such a never-endingly everpast ages there was the Great Creation Power in its motion for the future creation.

During the never-endingly everpast ages there were the three attributes of the Great Creation Power such as the omnipotence, omniscience and omnipresence. But they were only in their dormant stage during those never-endingly everpast ages. But from the beginning of the Infinity, that was from Omega years ago, those three attributes as the omnipotence, omniscience and omnipresence were in their abstract triangular motion.

Subsequently, there was the setting of the different stages of the Infinity in different ages. In each stage of the Infinity there was the ratiowise development

of darkness. Thus ultimately the Time-Deep was set and that Time-Deep was with the filling up of those darknesses that had been developed in different ages of the Infinity.

Finally from that Time-Deep such a filled-up darknesses shadowed the shadow of the Space-Deep in such a Time-Deep. Here the filled-up darknesses turned as the shadowed shadow and the Time-Deep turned as the shadowed Space-Deep [Space-Deep is only as though a shadow].

Thus from the shadow of the Space-Deep its reality is made seen through the real Vacuum-Deep, and the Time-Deep is made turned as the real Space-Deep. But then it was in its unshaped vacuum Space-Deep.

Further, by the circular passing of the light through all the areas of the till-then developed unshaped vacuum Space-Deep, that unshaped vacuum Space-Deep is transformed into the circular shape as the from then circularly set Circular Big Vacuum Universe as the Mother Universe from Alpha years ago.

Further for the birth of Our Universe of Time from the Mother Universe, from that Alpha years ago there started the vacuum motions against the vacuum conflicts within such a Circular Big Vacuum Universe, and such vacuum motions against the vacuum conflicts continued till 2300 crore years ago for the birth of the Time Universe from then as the first step of the birth of Our Universe of Time from 2300 crore years ago, that is 'IN THE BEGINNING.'

But only from 704 crore years ago there was **the First Nuclear explosion** and the consequent **First Banging out of voice**. In between, there were many processes from 2300 crore years ago till 704 crore years ago.

12 STEPS FROM THE GREAT CREATION POWER TILL THE VACUUM MOTIONS AGAINST THE VACUUM CONFLICTS

1. The Great Creation Power was in its motion from the never-ending ages of the past, that is from the countless innumerable ages prior to the Infinity.
2. But the three attributes of the Great Creation Power such as the omnipotence, omniscience and omnipresence were in their dormant stage during those never-ending ages of the past [for the past ages prior to the Infinity].
3. In addition to this, the Great Creation Energy [of the Great Creation Power] was in its dormant stage during all the ages and stages of the universe till the beginning of the Origin of the Matter universe from 360 crore years ago.
4. The beginning of the Infinity was from Omega years ago where there was the stop of the till-then dormant stage of the three attributes of the Great Creation Power, and from then the omnipotence, omniscience and omnipresence were in their abstract triangular motion for the beginning of the Infinity from Omega years ago. Omega is 1 with 140 zeros as **141 digits** [Omega = Alpha¹⁰].
5. During the different stages of the Infinity there were the progressive ratios of darkneses where each ratio of darkness was in development in each of the stages of the Infinity.
6. Thus there was formed the **TIME-DEEP** of the Infinity of both the countless innumerable ages of the past prior to the Infinity + the ages during the Infinity as the ages from Omega years.
7. This kind of formed **Time-Deep** during the Infinity was filled up with the darkneses of all the Ages of the Infinity. These filled-up darkneses were the progressively formed darkneses of the Ages of the Infinity.

8. So almost at the end of the Infinity Beta years ago, the till-then filled-up darkneses in the **Time-Deep** shadowed for a **Space-Deep** of the universe [**Here the universe was only as a shadow of the Space-Deep**].
9. So from that Time-Deep being filled up with the darkneses of the Infinity, there shadowed the shadow of the Space-Deep as the **Universe of Spaceless space** [**Space is only as though a shadow**]. This stage further continued for Beta years of Alpha \times Alpha as 1 with 28 zeros which is in **29 digits**. [Alpha is crore \times crore as 1 with 14 zeros which is in **15 digits**. Further Beta is 1 with 28 zeros which is in 29 digits].
10. At the end of such a Universe of Spaceless space [Here the Space-Deep was only as though a shadow.], from Beta years ago began the formation of the unshaped Vacuum universe of real space. And that level of formed unshaped stage of the Vacuum universe was in its fullness from 2 Alpha years ago and after its fullness of formation further it continued for Alpha years. This means the unshaped Vacuum universe (unshaped vacuum Space-Deep) further continued for Alpha years (crore \times crore years).
11. At the end of the above-said parenthetical Alpha years [the Alpha years of the already formed unshaped stage of the Vacuum universe with its Vacuum space], the light shined circularly through all the areas of the till-then unshaped Vacuum universe and thus from then was shaped and formed the Circular Big Vacuum Universe [The till-then unshaped Vacuum universe was here transformed as the Circular Big Vacuum Universe]. Thus from Alpha years ago from now, there has been existing the Circular Big Vacuum Universe of Alpha years of age which still (presently) continues as the Universe Behind of Our Universe **as its Mother Universe**.
12. The first layer of Our Universe as the Metaphysical universe of vacuum motions against the vacuum conflicts got origin from that Alpha years ago where the Infinity got a stop with its evolutionary contribution of the Mother Universe as the Universe Behind of Our Universe.

THE BIRTH OF OUR UNIVERSE FROM ITS MOTHER UNIVERSE AS A CHART

I. From Omega years ago till Beta years ago there was the development of the darkneses which finally shadowed for the Spaceless space universe [Space-Deep is only as a shadow].

◆ Beta years ago

The till-then development of the darkneses had a stop with the shadow of the universe as Spaceless space universe [Space is only as a shadow].

From then began the unshaped Vacuum universe of real space into formation from that shadowing of the universe.

II. From Beta years ago till 2 Alpha years ago the unshaped vacuum Space-Deep got developed [Here shadow was transformed as a reality].

◆ 2 Alpha years ago

The unshaped vacuum Space-Deep that developed from Beta years ago came to an end here.

From here the light was passing/spreading through all the areas of the unshaped vacuum Space-Deep.

III. From 2 Alpha years ago till Alpha years ago there was the transformation of the unshaped vacuum Space-Deep into the circularly formed shaped Circular Big Vacuum Universe.

◆ Alpha years ago

The already set unshaped vacuum Space-Deep that had been transformed into the circularly shaped and circularly formed stage from 2 Alpha years ago ended here Alpha years ago.

Thus from Alpha years ago there has been existing the Circular Big Vacuum Universe which still continues as the Universe Behind of Our Universe as its Mother Universe.

IV. From Alpha years ago till 2300 crore years ago there had been the vacuum motions against the vacuum conflicts and that stage was the Metaphysical universe being the first layer for the setting of Our Universe.

◆ The first layer of Our Universe as the Metaphysical universe

From Alpha years ago there began the vacuum motions against the vacuum conflicts within the Mother Universe, that is within the Circular Big Vacuum Universe.

But 2300 crore years ago there took place a turning for the vacuum motions against the vacuum conflicts [which had already begun from Alpha years ago] by there getting a beginning for the conflicts between the knowledge of good against the knowledge of evil with the beginning of the Time Universe from that 2300 crore years ago.

THE TIMELESS MOTHER UNIVERSE WITH ITS CHILD UNIVERSE OF TIME

[The Timeless Universe from behind of our Universe of Time]

1. The Timeless Universe of **Omega**^{Omega} years as the countless innumerable ages with no beginning at all
2. The Infinity ages began from Omega years ago and that Omega is 1 with 140 zeros **as 141 digits**.
3. The filling up of the different ratios of darkneses of different Ages of the Infinity shadowed the shadow of the Space-Deep as the Universe of Spaceless space [Space is only as though a shadow.] with the from-then being formed unshaped Space-Deep from that shadow of the Space-Deep from Beta years ago. Beta is 1 with 28 zeros **as 29 digits**.
4. Thus from that Beta years ago began the formation of the unshaped Vacuum universe of real space.
5. So subsequently such a formed unshaped stage of the Vacuum universe was set in its fullness 2 Alpha years ago [$2 \times \text{crore} \times \text{crore}$ years ago].
6. Further, from that 2 Alpha years ago the light passed/spread circularly throughout the areas of that already formed unshaped Vacuum universe. Thus together with the spreading of light circularly the total area of the till-then unshaped Vacuum universe was being circularly shaped for the time of the next $\text{crore} \times \text{crore}$ years.
7. Thus finally Alpha years ago or $\text{crore} \times \text{crore}$ years ago from now, there was set the Circular Big Vacuum Universe due to the already passing of light circularly and transforming the till-then unshaped Vacuum universe as the Circular Big Vacuum Universe. That Alpha years old Circular Big Vacuum Universe is still the Universe Behind of Our Universe as its Mother Universe.

OUR UNIVERSE OF TIME IS THE CHILD UNIVERSE BORN FROM THE TIMELESS UNIVERSE AS ITS MOTHER UNIVERSE.

In the already set Alpha years old Circular Big Vacuum Universe [the Mother Universe] from that Alpha years ago began the vacuum motions against the vacuum conflicts till 2300 crore years ago where there was the birth of Our Universe of Time from that 2300 crore years ago.

I. The Universe of Time

The Universe of Time began from 2300 crore years ago [It is the foretold 'IN THE BEGINNING']. This great turning was from the Mother Universe to the Time Universe, that is, from the already happening vacuum motions against the vacuum conflicts there got the turning 2300 crore years ago with the conflict between the knowledge of good and the knowledge of evil.

The next step of the Universe of Time began through the five actions within the first half a second (within the first time wave) such as division, split, friction, conflict and motion during that first half a second. Further, these five actions continued in each half a second through the vehement never-endingly everpast motions of the time waves.

Because of the circular motions of such never-endingly everpast time waves **the Time Universe** was bordered circularly with the **horizon** around the Universe of Time.

Within the circularly set border of the horizon there was the filling up of the waves of ideologies for a long duration and finally such a greatly filled-up waves of ideologies got vehemently burst out as the **First Nuclear explosion** that took place 704 crore years ago with an end of that stage of the Time Universe.

II. The Universe of Space

As the immediate result of the First Nuclear explosion, through the vehement bursting out of the already filled-up waves of ideologies, there was **the First Banging out of voice**.

Further there was the speedy filling up in the space with the great booming voices, with its incredibly great power and invincibly and exceedingly surpassing reverberating energies continuously as their filling up in the space for a very long duration.

As the final stage of the Universe of Space there was the great filling up of by-products and neutral elements which was visible, audible and tangible. So there were flashes of lightning, rumbling voices, and peals of thunder continuously.

The stage of the Universe of Space was finished 360 crore years ago by the stop of the till-then dormant stage of the Great Creation Energy (of the Great Creation Power) to pass through the-then most greatly and most extremely thickly concentrated state of the neutral elements with a great bursting out of such a greatly concentrated state of the neutral elements as **the greater and Second Nuclear explosion** in the universe.

III. The Universe of Matter

As the immediate result of **the Second Nuclear explosion** through the great and large bursting out of the most extremely concentrated state of the neutral elements 360 crore years ago there was **the Second Banging out of voice** as the beginning point for the creation of the Matter universe.

Further, from 352 crore years ago there was the filling up of the Universal ocean of unquenchable fire everywhere in the already set Space even with great velocity and speedy motion with the spreading of such an unquenchable fiery waves together as the Universal ocean of unquenchable fire.

Further the stage of the Universal ocean of unquenchable fire had been changed through its slow cooling down, where in each stage of its each ratio of cooling down the matter from the top category of the most precious stones and diamonds of the most excellent brightness and greatest brilliance down to the basest metals like iron and lead—totally there was the origin of the great and huge quantity of matter, that had been divided and skipped across and over everywhere in the Space and set as different stars and from which were set their respective different planets.

Thus 344 crore years ago the unobservable Matter universe, which is the two-third portion of the Matter universe, was set together in the North and in the West and in the East with the Eastern Vacuum Gulf as the largest Vacuum Gulf that covers a portion of the entire universe, and such a largest Vacuum Gulf was set just underneath around the two-third portion of the unobservable Matter universe. Underneath of such a largest Vacuum Gulf further there was set in the South the presently observable universe which is only the one-third area of the Matter universe. Just around the underneath areas of the observable Matter universe, diagonally there is set another Vacuum Gulf which is the Southern Vacuum Gulf. Underneath of this Southern Vacuum Gulf there is the Underworld areas of the universe in the one-ninth area of the Matter universe. This underneath Underworld universe is liable to be in different changes and transformations.

The Chart on:

**THE FIVE REASONS FOR THE MOTHER UNIVERSE
THAT BECOMES THE REASON FOR OUR UNIVERSE
[The Universe Behind is the reason for Our Universe].**

1. The never-endingly everpast countless and innumerable ages and the Great Creation Power in its motion in that never-endingly everpast ages are together the first reason for the Mother Universe (the Universe Behind of Our Universe).

2. The attributes of omnipotence, omniscience and omnipresence (of the Great Creation Power) are in the abstract triangular motion which is the second reason further with the ratiowise developing of the darkneses in the Infinity as the agent of formation of the Mother Universe, the Universe Behind.

3. The Spaceless space stage of the universe as only a shadow for/of the Space-Deep is the third reason which is the beginning step of the Mother Universe.

4. The unshaped stage of the real Space-Deep is the fourth reason as an unshaped vacuum space which is the second step of the Mother Universe.

5. The passing of the light circularly in all the areas of the unshaped vacuum space is the reason for the circularly set stage for the shaped and formed **Circular Big Vacuum Universe** as the fifth reason which is the third step of the Mother Universe.

6. The circularly set Circular Big Vacuum Universe from Alpha years ago (from crore × crore years ago) further with vacuum motions against vacuum conflicts is the sixth reason which is the fourth and final step of the real Mother Universe that gives birth to Our Universe of Time, of Space and of the Matter universe.

THE TABLE FOR 141 DIGITS AS OMEGA WHICH IS DIVIDED ON ACCOUNT OF ALPHA AS THE BASE

1. ALPHA = Crore × Crore as 1 with 14 zeros [15 digits]
2. BEPHA = Alpha × Crore as 1 with 21 zeros [22 digits]
3. BETA = Alpha × Alpha as 1 with 28 zeros [29 digits]
— This is Crore × Crore × Crore × Crore
4. GAMMA = Beta × Alpha as 1 with 42 zeros [43 digits]
5. DELTA = Gamma × Alpha as 1 with 56 zeros [57 digits]
6. EPSILON = Delta × Alpha as 1 with 70 zeros [71 digits]
7. HETH = Epsilon × Alpha as 1 with 84 zeros [85 digits]
8. KOPH = Heth × Alpha as 1 with 98 zeros [99 digits]
9. VAW = Koph × Alpha as 1 with 112 zeros [113 digits]
10. ZAIN = Vaw × Alpha as 1 with 126 zeros [127 digits]
11. OMEGA = Zain × Alpha as 1 with 140 zeros [141 digits]

Alpha is the base of the multicrore calculations. The same Alpha is the beginning of the Infinity, for us to enter into the Infinity. Omega is the ending of the Infinity when we cross the Infinity and further enter into the never-endingly everpast ages which has no beginning and the representation of the never-endingly everpast ages is Omega^{Omega} but where Omega is Alpha¹⁰.
