

THE ORIGIN OF THE UNIVERSE

**THIS ONLY ANSWER OF THE ORIGIN OF THE UNIVERSE IS
WITH THE ORIGIN OF THE UNIVERSAL MATHEMATICS
FROM THE SETTING OF THE UNIVERSE**

[SO THE ORIGIN OF THE UNIVERSE AND THE UNIVERSAL MATHEMATICS ARE INSEPARABLE].

**THE UNIVERSE ORIGINATED FROM THE
GREAT CREATION POWER AND FROM
THE ABSTRACT TRIANGULAR MOTION**
[The creation of the universe in seven steps begins from the same].

I. THE SETTING OF THE INFINITY

The Great Creation Power of the never-ending ever past together with the never-endingly past Abstract Triangular Motion of omnipotence, omniscience and omnipresence became the cause of setting the Infinity from the timeless time past.

II. THE SETTING OF THE CIRCULAR BIG VACUUM UNIVERSE

The different ratios of darkneses of the different stages of the Infinity together with the timeless time power of the Infinity became the cause of setting of the Circular Big Vacuum Universe in the-then existing Time-Deep of the never-ending ever past + of the Infinity.

III. THE PRE-NUCLEAR STAGE

The friction between the positive motions of Vacuum motions against the negative motions of Vacuum conflicts in the Circular Big Vacuum Universe became the cause for the Pre-nuclear stage which is still in the Circular Big Vacuum Universe.

IV. THE FURTHER LEADING TO THE NUCLEAR STAGE

The above-said Pre-nuclear stage ended up with a great division, and thus there was the conflict between the knowledge of good and the knowledge of evil as the knowledge of good and evil that became the cause for the beginning of Time with the first time wave of the firstly done five actions of division, split, friction, conflict and motion within the first half a second which is the first time wave.

V. THE FIRST BANGING OUT OF VOICE

The above-said five actions of each of the further time waves together with the power of the never-stopped never-endingly passing time waves together became the cause for the Nuclear stage with the First nuclear explosion even with its immediate effect of the Banging out of voice which is the First Banging out of voice.

VI. THE SPACE

The First Banging out of voice with the-then echoed seven types of Mighty voices further with the result of the great and boisterous reverberating booming voices with its incredibly great power and invincibly and exceedingly surpassing energies that continued for a few hundred crores of years, became the cause for the setting of the Space, into which afterwards the further formed Matter universe is involved.

VII. THE MATTER UNIVERSE

The Second Banging out of voice and the greatly passing of the enormously fervent heat together in motion became the cause for the formation of the Universal fiery ocean, from which in the slow cooling down the very huge quantity of different types of matter formed by and by, and later that was divided into pieces for the setting of them as stars and planets in the Space with the respective paths of rotation and revolution in the Space for each of them .

The creation through dissolution theory is here firstly applied for the creation of the Matter universe.

THE CREATION THROUGH DISSOLUTION THEORY IS FIRSTLY APPLIED FOR THE CREATION OF THE MATTER UNIVERSE.

The greatly passing of the enormously fervent heat through the very thickly concentrated state of the already existing Neutral elements became the cause for the Second Banging out of voice with the-then echoed nine types of great and boisterous reverberating peals of unceasing Thundering voices.

Further, with the already passing of the extensively and exceedingly enormous fervent heat together with the Second Banging out of voice in great motion became the cause for the gushing out (formation) of the Universally spread fiery ocean.

From the Universal fiery ocean's slow cooling down state, the different types of matter were vomited one by one, where firstly came out the very highest quality of matter; then secondly came out the secondary highest quality of matter; then thirdly came out the high quality of matter and that high quality of matter is seen in the look of the last moments of the setting sun and it is more excellent than the very clean fine gold.

Thus altogether a huge quantity of matter came into existence and further it was divided into pieces for the setting of them as the stars and planets in the Space into their rotation and revolution set in the Space.

HERE THE UNIVERSAL MATHEMATICS IS ORIGINATED.

A skilful man's very skilful action and calculation is very necessary here to divide the Space for each Region of stars, for each Zone of stars, for each Circuit of stars, for each Angle of stars with its Chains of stars, for each Constellation of stars, for each Sphere of stars and for each Star with its planets and satellites together as the Star system like the Solar system with enough gap in the Space for each range for its rotation and revolution without any clash at any time.

THE ORIGIN OF THE UNIVERSAL POWERS TO SET THE MATTER UNIVERSE IN ROTATION

Through the power of attraction and the power of repulsion between the North Pole and the South Pole, there originated the Universally covered everywhere working magnetic power for the attraction of each star and each planet into their respective paths of rotation and revolution.

The stars and planets of the very highest quality of matter were attracted towards the North Pole to set all of them as the Northern Region.

The stars and planets of the secondary highest quality of matter were attracted by the North towards the North Pole to place them in the west as the Western Region.

The stars and planets of the high quality of matter were attracted by the North towards the North Pole to place them in the east as the Eastern Region.

The remaining stars and planets were settled in the south with the repulsion to the south as the Southern Region. In these settings of the stars and planets the extreme south is kept vacant for/as the Underworld.

The Universally covered revolving whirlwind tempestously worked for the taking of the skipped matter pieces as the stars into their respective orbits of rotation and revolution.

Here the division, split, friction, conflict and motion and all the Universal powers altogether were made to work for the setting of the huge matter pieces as stars and planets in their respective orbits of rotation and revolution in the Space.

Here the Star systems (like the Solar system) were set within each Sphere of stars, where the fully measured area of Space is set apart for each Star system and where its star at the centre (like our Sun) with its own area of circuit together with the own areas of Space around for each planet with its own respective area of circuit including its satellite/satellites with its own area of space for its own space of circuit around its planet.

THE RANGE OF $\frac{6}{9}$ AREA OF THE MATTER UNIVERSE WAS CREATED AT FIRST AND THIS IS THE UNOBSERVABLE UNIVERSE TILL TODAY.

Though the passing of all types of waves together with the never-stopped ever-passed time waves is in $\frac{2}{9}$ total area yet

- 1) The First Banging out of voice with its echoed seven types of Mighty voices passed through the $\frac{6}{9}$ area.
- 2) The great and boisterous reverberating booming voices with its incredibly great power and invincibly and exceedingly surpassing energies filled up in that $\frac{6}{9}$ area.
- 3) So totally the Space at first is set in that $\frac{6}{9}$ area.
- 4) The Neutral elements further got filled up in the $\frac{6}{9}$ area, that is in the space of $\frac{6}{9}$ area.
- 5) The Universally spread fiery ocean is filled in this $\frac{6}{9}$ area. So further through the slow cooling down the matter was vomited in a huge quantity only in this $\frac{6}{9}$ area.
- 6) So the first Range of Matter universe was set only in this $\frac{6}{9}$ area as the unobservable universe to us till now.
- 7) So the attractive system of the Matter universe was set in this unobservable universe in $\frac{6}{9}$ area, where our $\frac{2}{81}$ area of Dry land was the beneath part in which the Earthsphere and our planet earth was included.

Thus the remaining $\frac{3}{9}$ area (the remaining half area) was lying beneath as the spaceless space (Half an area was *soonya*.) which was but the part of the $\frac{2}{9}$ area through the passing of all types of waves together with the never-stopped ever-passed time waves also in that $\frac{3}{9}$ area. Thus here $\frac{2}{3}$ area is the already created the unobservable $\frac{6}{9}$ area of Matter universe and the remaining $\frac{1}{3}$ area ($\frac{3}{9}$ area) was kept *soonya* at that time.

Our $\frac{2}{81}$ Dry land area later got separated from the $\frac{6}{9}$ area of unobservable universe and ran down from the north to the south with the great booming voices to set it down to all the $\frac{8}{9}$ area of habitable Matter universe.

This happened for the in-between creation of the Matter universe in the remaining $\frac{2}{9}$ area. Then totally there is the $\frac{8}{9}$ area of habitable Matter universe as both the unobservable universe in $\frac{6}{9}$ area as the first creation and the observable universe (to us) in $\frac{2}{9}$ area as the second creation. Underneath of these total $\frac{8}{9}$ area of habitable universe, now our $\frac{2}{81}$ area of Dry land is situated from the Midair down to the Earthsphere and earth. *But this our $\frac{2}{81}$ area of Dry land took its present placement prior to the second creation that happened in $\frac{2}{9}$ area.*

The cause of the Eastern Vacuum Gulf in between the $\frac{6}{9}$ area of unobservable universe and the $\frac{2}{9}$ area of observable universe

The great separation and running down of the $\frac{2}{81}$ area of our Dry land from the north to the south, that is, to the underneath of the $\frac{8}{9}$ area of total habitable universe, is the cause of the Eastern Vacuum Gulf.

Underneath also of our $\frac{2}{81}$ Dry land area, at the extreme south there is the $\frac{1}{9}$ area kept vacuum as the Underworld. In between this $\frac{1}{9}$ area of Underworld and the $\frac{2}{81}$ area of our Dry land there is the diagonally lying Southern Vacuum in $\frac{1}{567}$ area of the total universe which is misunderstandingly seen as the dark holes.

NB.

1. The $\frac{2}{81}$ area of Eastern Vacuum Gulf that is situated between the $\frac{6}{9}$ area of unobservable universe and the $\frac{2}{9}$ area of observable universe is rather strictly between the Eastern Region and the Southern Region. While the Eastern Vacuum Gulf is close to the Eastern Region it is known as the Eastern Vacuum Gulf.
2. The Earthsphere in relation to us is the smallest unit of a number of stars in relation with us (with their sweet influence upon us). In this Earthsphere the Solar system and our planet earth is contained as its lowest part.

THE ORIGIN OF THE UNIVERSE FURTHER REVEALS THE ORIGIN OF THE UNIVERSAL MATHEMATICS

The Universal Mathematics reveals the digital values till 141 digits. This, till 141 digits, has an easy method of calculation if '0' is put at the left side of 1. 0 value is the beginning value being the pivotal aspect in this Universal Mathematics.

Different values seen in '0'

1. 0 alone seen anywhere is the valueless 0, ie., $\bar{0}$.
2. 0 at the left side is valuable as 0 at the right side is valuable.
3. If 0 at the left side of 1 jointly gives the strict 1 value from 0, 0 at the right side of 1 jointly gives the strict 10 value from 1 as then 1 to 10 = 10.

But by starting from 0 as the beginning value, then 10 gives an 11 value from 0.

eg. 10 to 20 = 11

as 0 to 10 = 11

0 as the beginning value in different dimensions

1. 0 is the beginning value on the scale of measurement. So 0 is seen on every scale as the beginning value.
2. 0 is the beginning value on the clock as the 0 o'clock from which the time measurement begins.
3. For every circle value 0 is the beginning value.
4. Only on the circle the ending value comes back in the same 0 in 360°. Here '0' has double power as $\frac{0}{0}$.
5. The first day on the calendar begins from 0 and the fullness of the total hours of a day is the first day.

So the second day begins from 0 after this fullness of the first day.

From the Palaeolithic Age **1** was counted as their beginning value. In the Palaeolithic Age they counted **1** as the beginning value by taking the first stone in their hand. So now also for the counting value **1** is used at first. Strictly the Mathematicians should confirm that **1** is the beginning value only for counting. Except for the counting of things, **0** is the universally applicable beginning value. Concerning the universe, this **0** is the beginning value for every aspect of the universe except for the counting of stars.

Here only **1 to 8 = 8**

1 to 9 = 9

1 to 10 = 10

Otherwise the real values begin from **0**.

0 to 01 = 1 (While **01** is the **1** value of the simple fractions of **1** that begin from **0** and end at the left side of **1**)

0 to 1 = 2 (The Additional **1** value of the simple fractions of **1** at the left side + the Other **1** value of the mixed fractions of **1** at the right side = **2**. This is the added value of the simple fractions of **1** and the mixed fractions of **1** together as **2**)

0 to 2 = 3 (The Additional **1** value of the simple fractions of **1** at the left side + **2** at the right side = **3**)

0 to 3 = 4 (The Additional **1** value of the simple fractions of **1** at the left side + **3** at the right side = **4**)

0 to 4 = 5 (The Additional **1** value of the simple fractions of **1** at the left side + **4** at the right side = **5**)

0 to 5 = 6 (The Additional **1** value of the simple fractions of **1** at the left side + **5** at the right side = **6**)

0 to 6 = 7 (The Additional **1** value of the simple fractions of **1** at the left side + **6** at the right side = **7**)

0 to 7 = 8 (The Additional **1** value of the simple fractions of **1** at the left side + **7** at the right side = **8**)

0 to 8 = 9 (The Additional **1** value of the simple fractions of **1** at the left side + **8** at the right side = **9**)

0 to 9 = 10 (The Additional **1** value of the simple fractions of **1** at the left side + **9** at the right side = **10**)

0 to 10 = 11 (The Additional **1** value of the simple fractions of **1** at the left side + **10** at the right side = **11**)

Here we see in this table that **0** at the left side stands for the Additional **1** value of the simple fractions of **1** at the left side. If instead of **0** at the left side here **0** alone stands then it is the valueless **0**. Really here **0** at the left side stands for a **1** value. So here this same **0** at the left side is mentioned as the **01**. This **01** stands for the Additional **1** value at the left side as the Additional Digit **01**.

Really this is the acceptable Universal Mathematics that is to be applicable universally everywhere while **0 to 9 = 10**; then **0 to 99 = 100** and while **0 to 10 = 11** then **0 to 100 = 101**.

The simple fractions of 1 as the Real 1 value begin from **0** and end at the left side of **1**. This is the **01** value which means that the strict **1** value begins from **0**.

But **the mixed fractions of 1 as the Other 1 value** begin from **1** and end at the fullness of **1**, that is, till at the left side of **2**.

+0 and -0

0 as the beginning value for the clockwise direction is **+0**.

0 as the beginning value for the anticlockwise direction is **-0**.

This **-0** is the **0** towards the continuity of the minus values as **-1, -2, -3** etc.

So **-0 - 0 = -1**.

$\frac{41}{13}$ IS TO BE SET LOGICALLY IN MANY DIMENSIONS INSTEAD OF THE PRESENT PIE VALUE OF $\frac{22}{7}$

Again the fascinating aspect here we see is $\frac{41}{13}$ gives the totality of the **9** digital value such as **4 + 1 + 1 + 3 = 9**, whereas $\frac{22}{7}$ gives the totality of **11** digital value such as **2 + 2 + 7 = 11**. Moreover, **13** being the controversial and problematic number as the denominator in $\frac{41}{13}$ is more reliable than ‘**7**’ the perfect number as the denominator in $\frac{22}{7}$ which is only the arbitrary value.

4 × 0 = ?

From the beginning of the bullock cart Age unknowingly mankind says $4 \times 0 = 0$.

They said like that pervertedly based on the four times **0** is understood by them then as **4 × 0** (**0**, 4 times) as **0 + 0 + 0 + 0 = 0** which they then said that **4 × 0 = 0**.

So please find out the genuineness of **4 × 0 = 0** by now seeing **0 + 0 + 0 + 0 = 0** as four times addition of **0 = 0**.

So see a simple example of 4×0 from the day-to-day life.

If 4 cows are grazing in the next field and in this field no cow is grazing as 0 cow, when those 4 cows are multiplied by the 0 cow, the answer is that still there are 4 cows, because when they are multiplied by the 0 cow, neither do those 4 cows evaporate nor do they disappear.

It is to be clarified that, in effect, multiplication is additions in different times, as

$$1) 2 \times 2 = 2 + 2 = 4$$

$$2) 3 \times 3 = 3 + 3 + 3 = 9$$

$$3) 4 \times 4 = 4 + 4 + 4 + 4 = 16$$

$$4) 5 \times 5 = 5 + 5 + 5 + 5 + 5 = 25$$

If it is so, $4 \times 0 = 4 + 0 = ?$

whereas, in effect, the power value is multiplications in different times, as

$$4^4 = 4 \times 4 \times 4 \times 4 = 256.$$

The multiplication of zero 4 times as the additions of $0 + 0 + 0 + 0 =$ surely 0.
But 4 things multiplied by a 0 thing never is again 0 thing, rather there are still 4 things as $4 \times 0 = 4$, that is, $4 + 0 = 4$.

NB. The detailed explanation is ready in need.
