

ORIGIN OF THE UNIVERSE

I. GREAT CREATION POWER WITH GREAT CREATION ENERGY

From beyond all the ages of the past, even from the never-measured never-ending ages of the past, there was the Great Creation Power with the continuous/always existing motion of creation with its Great Creation Energy which was in dormant state till the time of creation of the Matter Universe in the future after very long processes that are to be prior to the formation of the Matter Universe.

II. THE CONTINUOUS MOTION OF CREATION WITH OMNIPOTENCE, OMNISCIENCE AND OMNIPRESENCE

The continuous/always existing motion of creation was the triangular motion of together the Omnipotence, Omniscience and Omnipresence. This continuous/always existing motion of creation was without a beginning but with the turning together with the beginning of Infinity during the timeless time ages.

III. FROM THE TIME-DEEP THERE WAS THE INFINITY OF TIMELESS TIME.

The Infinity is based on the Time-Deep of the continuous/always existing motion of creation, and with the timeless time of seven

ages of Infinity. The ages of Infinity were filled up with the different ratios of seven types of darkneses and its end was with the circular spreading of light.

IV. THE FORMATION OF THE VACUUM UNIVERSE THROUGH THE SPREADING OF LIGHT

The result of the circularly spreading light against the darkneses was the removal of darkneses from the Vacuum Universe. This removal of darkneses resulted in the formation of the Circular Big Vacuum Universe being with the spread light in it. The Circular Big Vacuum Universe is the Mother Universe (of our universe) by bearing in it all the gravitational force by which our Matter Universe is hung in its totality.

V. HERE THE ENORMOUS DEPTH OF VACUUM IS CLARIFIED THROUGH THE SHINED LIGHT.

Naturally the light spread circularly. So the Vacuum Universe is clarified as the Circular Big Vacuum Universe.

VI. THE IDEOLOGICAL CONFLICT IS THE FIRST CONFLICT (IN THE VACUUM UNIVERSE AT FIRST).

When the light got spread against the darkneses, from then there the ideological conflict began as the vacuum motions against the vacuum conflicts.

THE DIFFERENT PROCESSES PRIOR TO THE FORMATION OF THE MATTER UNIVERSE

The Time-Deep of the continuous motion of creation

The timeless time of seven ages of Infinity

The vacuum motions against the vacuum conflicts

(The conflicts are begun).

The Universal Mathematics based on -0 , $+0$ and $\frac{0}{0}$

The ages of Infinity with different ratios of darkneses are removed from when the perpetual age of spreading light began for the Universe of Spaceless space (for the Vacuum Universe) with the vacuum motions against the vacuum conflicts for the future formation of the Universe of Time and Space. Here the already removed darkneses of Infinity remained as the clouds of Infinity which never comprehended/overpowered the spreading light.

Here comes the Universal Mathematics based on -0 , $+0$ and $\frac{0}{0}$.

The nullification of the already existed Infinity with different ratios of darkneses shows the -0 .

The Universe of Spaceless space being with the spreading light perpetually shows the $+0$.

The resultant formation of the Universe of Time and Space shows $\frac{0}{0}$.

4

The friction of knowledge of good against the knowledge of evil
(There was the division of the till-then existing knowledge of evil which
was from then divided as the knowledge of good and the knowledge of evil).

In this division as the knowledge of good and the knowledge of evil
the first time wave of half a second took place **alarmingly**.

From then there was the beginning of time as ‘In the beginning.’

The Time

beyond

The Space

**The Space being with the around-border of horizon of 2300 crore circular
light years ($60 \times 60 \times 24 \times 360 \times 2300,000,000 \times 1,86,000$) was alone.**

Space within the around-border of horizon

At first in the Space there was the filling up of the half a second's time waves (as the further proceeding time waves from the first time wave that took place alarmingly) together with the division, split, friction, conflict and motion within that half a second (within one time wave) because through the motion of each time wave the above-said five actions took place.

After 1600 crores of years, that is after $60 \times 60 \times 24 \times 360 \times 1600,0000000 \times 1,86,000$ time waves there was the filling up in the Space with the filled-up waves (Five action waves got filled up within half a second or within a time wave.) that resulted in an explosion as the banging out of voice 704 crore years ago.

In the Space secondly, there was the filling up of the sound waves/voice which began from the firstly happened nuclear explosion 704 crore years ago.

In the Space thirdly, there was the filling up of the ideological waves prior to the formation of the Matter Universe.

The **Time Universe** turned for being the **Space Universe** through the division, split, friction, conflict and motion continuously or the time wave of half a second passed one after another where each time wave of half a second continued with the division, split, friction, conflict and motion. This stage continued for 1600 crore years where 704 crore years ago there was the filling up of the division, split, friction, conflict and motion and so got into a filled-up state with the first nuclear explosion for the Space Universe.

The North Pole is the root pole for the creation.

From the North Pole the Universal level rushing mighty wind blew at first. Such a great and rushing mighty wind rent the Infinity clouds into broken pieces and those Infinity clouds were based on the darkneses of the Infinity (This is not at all speaking about the clouds seen above us).

In the above-said process of the action of rending and breaking into pieces the Infinity clouds, there kindled and burst out the unquenchable fire. Beyond the Universally unquenchable fire, there got spread the emanation of the glorious bright light.

While the power of the speedy motion of the great and mighty wind slowed down, together with it the unquenchable fire got cooled down slowly where from the resultantly solidified unquenchable fire germinated/were produced the extremely huge and large quantities of precious stones and diamonds which emit bright and brilliant light.

Different motions used in creation

- (i) the vacuum motions
- (ii) the vacuum motions against the vacuum conflicts
- (iii) the ideological motions used for the creation
- (iv) the ideological motion exists against the ideological conflicts

The embellishing features together with the friction between the North Pole and the South Pole

- (i) The Universal level rushing mighty winds**
- (ii) The mighty tempestuous whirlwind**
- (iii) The Universally passing great magnetic power**
- (iv) The breaking power of the enormously and immensely brought-out huge quantities of matter into pieces finally as the stars and planets**
- (v) The skipping power to take the stars into such a long distance of its destined particular location**
- (vi) The shaking power**
- (vii) The Great Booming Voices that reverberate produce the enormous Universal power from the voice power**

NB. This is only an outline on the origin of the Universe. The explanation of the origin of the Universe may be given by the Discoverer-Author on a dais or in a webinar on demand, if it is arranged anywhere in the world by you the seekers of truth.
