

THE ANSWER TO THE GLOBALLY DISSATISFIED SCIENTIFIC THINKERS, DISAPPOINTED LEARNERS AND FRUSTRATED RESEARCHERS

As the fulfillment of the expectation of every nation, every kindred, every tongue and every people, and as the fulfillment of all the ancient epic writings of the mankind, now the real Wisdom is originating and coming up from the East and filling up in the whole world. By this reason the present scientific realm is globally concluded under Aggravated Ignorance.

CONCERNING THE INVENTOR, MR. M. T. ABRAHAM WITH THE PEN-NAME—THE MAN OF THE EAST

Through more than the last 40 years of intense meditation and deep research due to his dissatisfaction with the present academic mathematical and scientific learning that enforced him to quit such an unsatisfactory academical learning furthermore, in such acuteness and density of dissatisfaction and agony instead of falling into deep depression, he was enlightened for an independent learning through intense meditation and deep research with his deep desire and inquisitiveness of the detailed study of the universe and its origin more than its astronomical study, together with his profound learning of man in relation to the universe and for having a thorough learning of almost all the lives in the universe, beyond the botanical life and zoological life. His research was with the negligence of the search for bibliography from different books, encyclopedia or from internet with his conviction that if it had been done it would have limited him forever only with the existing limited knowledge and that it would have never enabled him to go up to the standard of the superior scientific facts, *the Superscience*. By uttering the answers of the till-now unanswered questions, from the East of the world he received his pen-name—**The Man of the East**.

So hereafter **the dissatisfied scientific thinkers and disappointed learners and frustrated researchers will have a silver lining with a better chance** for the superior scientific facts against the limitation of conventional learning and peer assessment by the present scientific realm which has never had a thought of these superior scientific facts ever before.

THE PRESENT GLOBAL SCIENTIFIC REALM IS UNDER AGGRAVATED IGNORANCE.

This is because:

1. They are yet to know what the universe is.
2. They are yet to know the Origin of the universe or how the universe came into existence.
3. They are yet to know that the universe is in layers and about the four layers of the universe, *and that each of them is in separate origin.*
4. They do not know about a universe, above and behind, which is **the Vacuum universe** in enormous and vast area as the main part for the existence of the remaining universe in its three layers.
5. They do not know about the entirely different **origin of matter** or how matter originated from **the fiery ocean**, which originated from the **enormously fervent heat** when it was used for **the first dissolution**, and that enormously fervent heat originated from **the Great Creation Energy** that had been timelessly always with **the Great Creation Power**.
6. They are yet to know the final result when matter is brought back into its reverse order, when in reverse order the matter is made to cross the stage of subatomic particles.
7. They do not know that as per their claim the bursting out of the voice is not at all the origin of the total universe; but that bursting out of the voice pertains only to one layer of the universe. Moreover, they are without knowing the reason for the bursting out of the voice.

Surely there is an exact reason for the bursting out of the voice.
We know it !

But the bursting out of the voice is the intermediate or middle-way action as the Agent in creation.

8. The world has been unknowingly following the same Mathematics that had been followed till the concept of the flat earth was changed by Galileo. Of course, the world is still made to follow the same. That shows still the scientific and mathematical realm is wrongly or inappropriately (not yet contextually) following the same Mathematics (that had been followed while there was the concept of the flat earth alive) and has been making the world to follow, in effect, the wrong Mathematics and also making the rest of the scientific realm to use the same wrong ‘flat earth Mathematics’ in their science too. *From when Galileo changed the concept of the flat earth into the fact of the round earth, never from then has an iota of change taken place in the basic Mathematics that ought to have been changed from then in accordance with the changed fact, the round earth.*

That we are trying, at least now in history.

Woe unto the world that still follows the earlier basic Mathematics that is in accordance with the concept of the flat earth!

Fig. 1

$$1 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 5 \rightarrow 6 \rightarrow 7 \rightarrow 8 \rightarrow 9 = 9 \quad \text{that is, 1 to 9 = 9, with 8 gap values}$$

Fig. 2

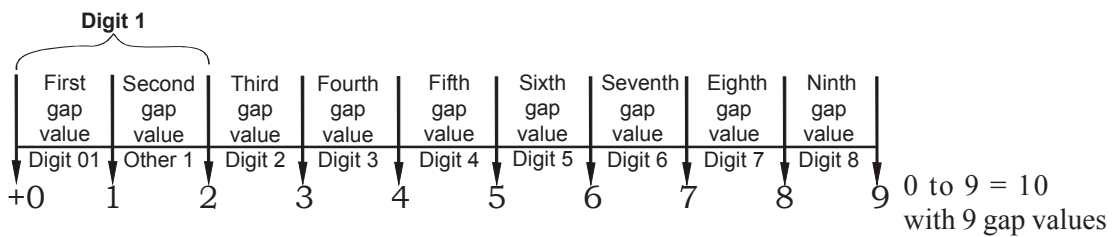

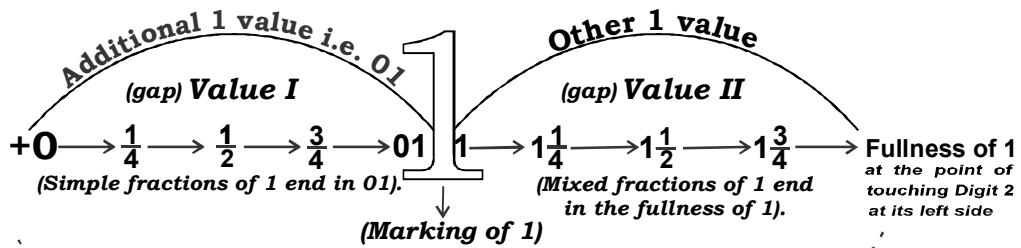

$$0 \rightarrow 1 \rightarrow 2 \rightarrow 3 \rightarrow 4 \rightarrow 5 \rightarrow 6 \rightarrow 7 \rightarrow 8 \rightarrow 9 = 10 \quad \text{that is, 0 to 9 = 10, with 9 gap values}$$

Without objection **1 to 9 = 9**, especially in counting.

But according to their concept of the flat earth, for them **0 to 9** also = **9**. But it is wrong according to the fact that the earth is round. How?

In the same manner as the mathematicians say that **1 to 9 = 9**, they wrongly say that **0 to 9** is also **9**, because they were taught and so they teach that there is no value for the **0** at the left side, according to the flat earth concept that has been continuing from the bullock-cart age. But in reality, that is, in the round earth Mathematics, **0 to 9 = 10** (see *Figure 2*). So in the round earth Mathematics, unchangeably **0** is the beginning value as the starting point except only in counting. **For every circle**, in all the measurements **0** is the starting point; **for every time measurement**, as it is seen on the clock, **0** is the starting point; and **in the measurement of space 0** is the starting point, which is strictly applicable

for the round earth too. If **0** is the starting point, there is additionally **1** value from **0** till the marking of **1**. This is the **Additional 1 value** at the left side, as the till-now hidden **Abstract Digit 01**. Here lie the simple fractions (at the left side of the marking of **1**) as the fractions of **01**. Further, there is **one more value** from the marking of **1** till the fullness of **1** as **the Other 1** with the mixed fractions of **1** till the fullness of **1**.

9. They know little about **0**, while there are seven values and applications for **0**.

Can you tell the prior value of **0** in relation to the total four layers of the universe?

Your present **0** at the right side is only post-value or ‘postscribed’ **0**.

10. They do not know the **Digit 1** and its uniqueness, dissimilarities and the totality of two 1^s in it.

Do you know that the origin of the remaining digits is from **Digit 1** and that the origin of all the digits and all the numbers is from the universe?

11. They know little about the Aliens in the other planets of the universe, about the knowledge of the Aliens, about their journeys and about their dwelling places.

Can you explain the psychical power and psychology of the Aliens, and can you differentiate them from man’s psychical power and man’s psychology?

Can you explain the rational power common to man and to the Aliens?

All this is described in our book, **The Aliens**, published in 2012.

Both mankind and Aliens have almost the same 'Darling' inner life permanently.

12. They know little about the mind and about the concentration of the abstract faculties in man, where the central point of that concentration is the mind.
13. **They know little that there are abstract faculties within the universe.** And in link with those abstract faculties, also they know little about the miniature of those abstract faculties of the universe being in concentration only in man on the earth.
14. They know little about the Ideological attractive system of the inhabited planets within the Material attractive system of the total universe.

By such an ignorance there is victimisation through earthquakes, tsunamis, hurricanes, tornadoes and such devastations, due to the conflict and contradiction of the Ideological attractive system with the Material attractive system.

Through the removal of this ignorance, there is better hope of remedy for all these natural calamities.

15. How much do you know about the Dark Holes and Vacuum Gulfs in the universe? Do you know that they are not a part in the Matter universe, but are a part in the Space universe as the area in the Space universe without the Matter universe in it, that is, without the stars and planets there with their attractive system, as the area in the Space universe always remains as those Dark Holes and Vacuum Gulfs. Nevertheless, in a moment, in the twinkling of an eye, the wandering stars are made to pass through these Vacuum Gulfs by their pulling down power to the other world, that is to the Underworld, by those wandering stars being snatched away there, to rotate there unceasingly in the dense and touchable darkness of the Underworld.
16. Do you know that the **Matter Universe** is hung in the Vacuum universe through the gravitational force in the Vacuum universe that holds it?

Moreover, there the Matter universe is upheld by the enormous voice power, so that in its own freedom the Matter universe is to fulfil its own course of rotating and revolving neverendingly in its fixed path, while it is hung. For example, while a ball is made to be hung in the air in front of small children, additionally without some external force, either through the children or from the atmosphere, there is no motion for the hung ball. So the pivotal and main purpose of the Space universe (which alone originated from out of the burst-out voice) is to make the Matter universe to rotate and revolve, while it is hung in the Vacuum universe, where the **first and main voice** is used. Further, from the Space universe, **the second or first subsidiary voice** is indwelling in the Matter universe figuratively as its bones. And again, from the Space universe, **the third or second subsidiary voice** always serves for the furnishing and finishing of the Matter universe, and that second subsidiary voice is contained in the Matter universe, particularly in all the metals. In general, the Space universe is the dwelling place for the Matter universe, while the Horizon universe is the courtyard of both and the Vacuum universe is the runway for the together-state of all these three.

17. THE FOUR LAYERS OF THE UNIVERSE ARE TO BE NOW MADE KNOWN TO THE WORLD.

- 1. THE VACUUM UNIVERSE** in the enormously vast area (in 14 fold area)
 - having an entirely separate origin through the gradual processes of formation from Infinity.

- 2. THE HORIZON UNIVERSE** that is always with the totality of the Physical universe of matter, that is in $\frac{2}{9}$ area [So there is no development for this Horizon universe, but only a transformation].
 - having a separate origin from 2300 crore years ago, from then through **the non-stop movement of time as the *Time Energy***, in the till-then knowledge that is divided into conflict-knowledge as the knowledge of good and evil, that is the knowledge of good and the knowledge of evil in conflict level, by which there was division, split, friction, conflict and motion (These five actions take place within the span of half a second, which is a time wave.) that continuously repeated for 1600 crore years, causing the filling up of the waves of ideologies during those 1600 crore years in

horizon rotation that resulted into the Horizon universe. This is the prenuclear stage with the *Time Energy* being the only energy at first and in that period.

3. **THE SPACE UNIVERSE** in the $\frac{9}{9}$ area minus $\frac{6}{81}$ area of *Tartarus* which is included only in the Horizon universe

- Of course the prenuclear stage was transformed into the nuclear stage. How did it happen? Through the fulfilling of the filling up of the waves of ideologies in horizon rotation as the Horizon universe, at its very end there was its great bursting out as the bursting out of the voices 704 crore years ago. **Here though this bursting out of the voices appears to be the reason for the Space universe, yet the real reason for the Space universe is the bursting out of the filled-up waves of ideologies, then resulting into the tremendous voices going bang.**

The entire scientific realm may please remove their Aggravated Ignorance of clinging on to the bursting out of the voice as the root reason for the universe. But that *bursting out of the voice is only Medium and Agent in creation*; and it is only in the middle way, when we realise that the Matter universe is still with entirely a different origin.

4. **THE MATTER UNIVERSE** having an entirely different origin and in $\frac{8}{9}$ area as the inhabitable universe apart from the area of the Underworld as the uninhabitable area.

- ◆ The Matter universe, for the most part, consists of the huge combination of the partially cooled-down different matters.
- ◆ Those different varieties and standards of matter emerged through the by and by cooling down of the Universal ocean of unquenchable fire.
- ◆ The reason for this Universal ocean of unquenchable fire is the never before happened dissolution.
- ◆ The reason for this dissolution is the very extensively fervent heat that could dissolve the neutral elements that originated as the

final result of the gradual processes of creation from Infinity, that is, at the very end of those processes.

- ◆ The reason for this enormously and very extensively fervent heat is the neverendingly existed Great Creation Energy together with its main part, the neverendingly existed Great Creation Power.

18. Do you have any idea concerning **the different lives in the universe** as the lives that proceeded either at the beginning of formation of the universe or from the formation of the universe or through the gradual processes of formation of the Matter universe? Some of those lives which anyone can comprehend are described below [These are the lives other than the presently known botanical and zoological lives that are concentrated only from the Atmospheric life].

1. The **Cosmic life** based on the Cosmic light is the life-giving-factor for each planet. Without the Cosmic light and the Cosmic life from it, the stars and planets become null and void, and so then they are dead planets.
2. The **Time is energy and life**. The time, its sensation, its power etc., as the life that is contained and involved in stars, in planets, in man, in all creatures and in all birds including microscopic organisms.
3. The **Product life** is the neverending life of each planet, being the part of the neverending Universal life. So the planet returns as the planet with the product life after the dissolution.
4. The **Planet life** dwells only in mankind [but not in the animal world] together with the biological life. So mankind alone is with the sensational feeling of nakedness in their biological life; need of clothing as the covering for their biological life; necessity of shelter for their biological life; urge for ornaments and adornments for their biological life; and the life of possession of one's own and one's own country (patriotism) for his/her biological life to be a meaningful life. Otherwise, that nothingness makes man to be a fugitive and a vagabond also in his biological life [But this is not applicable for animals].

The world may know about the limited lives that are concentrated from the Atmospheric life as the botanical life and the zoological life which

is with amoebaic life and plasmaic life, among which the aquatic life may be partially a part of it, where also the world could not realise the uniqueness of the life within and over the ocean, by the multitude of waters, being always kept with division, split, friction, conflict and motion, where through the separation of light and darkness upon the multitude of waters, there is the tumult of waves and billows. So please distinguish the uniqueness of life within and over the ocean as **the superoceanic life; the marine life of the ocean, and the aquatic life in the ocean.**

19. Aren't you ignorant of the fact **that there are four layers in everyman** [while there are four layers in the universe too]?

The first layer of more importance, very internally in man, is the **Inner Being of man** with his personality as the concentration of the abstract faculties which are the miniature of the abstract faculties from the four layers of the universe in concentration in man. Mind is the central point of such a concentration in man from the universe as his Inner Being.

[Ready to give the analytical explanation, on request and requirement].

The second and next very important layer of man is the **Man of figure** that is erected on two feet with such unique stature, with unique facial expressions, with unique thumb impressions and lines on the palm, unique eyelids, eyebrows, iris etc.

The third and next important layer of man is the **permanently remaining Darling inner life**, which is the 'self' of man with such an ego in him. In this self of man, *his spoken language power is the main factor, which is regulated and controlled by *his rational power (Otherwise, he appears to be a mad man). Through such a regulation there are both *the Law of intellect for the steadiness of his intellectual power and *an internally dwelling moral and ethical law inscribed in the heart to regulate him not to be brutal or not to be completely similar to a beast in behaviour [These two regulations are figuratively the bit and bridle on man]. *Friction, *conflict, *behaviour etc., lie here. With all these seven more factors of his permanently dwelling Darling inner life with his self in it, man alone has a better brain system with its better acceleration.

The fourth and finally important layer of man is his **temporarily dwelling** (on earth) **biological manhood**, because man alone is developed from the

third month in the womb of mother with a mixed life of beast-life and planet life. In the biological life though man is similar with the beast almost with the life of the beast, similar with the same breath and breathing, similar almost with the same courses of life and similar with the same fate of biological death and an end like the beast, yet due to the above-said mixed life, unlike all other beasts, **only in the biological man dwells the planet life**, by which mankind alone in their biological life is with the sensational feeling of nakedness, need of clothing, necessity of shelter, urge for ornaments and adornments, the life of possession of one's own and one's own country—through all these factors, unlike any beast the biological man alone leads a worldly meaningful life, even though he dies like the remaining beasts. In such a mixed biological life (mixture of beast-life and planet life) from one to another there is found the difference in the social status, even in colour, in birth, in stature, in possession, in other addings etc. So in the developed planet life, man weds woman as mainly between their planet life, but not between their beast-life.

In addition to the above-described importance of the four layers in man, in everyman there dwells a **negatively moving psychological power** which brings everyone into the *captivity* to serve all the negative natures as the great power of the negative personality in him, as one's split personality. ***The very reason for this is that there is a parasite in everyman as the Captive language being with all the negative natures.*** But through the **Normal conscience**, through the **Regained Childhood conscience** (if anyone could fulfil the Normal conscience), through the **Good conscience as the Subconscience** (if anyone could fulfil the Regained Childhood conscience) and through the **Root conscience** which is in link with the performance of the required duties, in their order and time, of the universe in its revolution and rotation (if anyone could fulfil the Good conscience), there is victory on this parasite (the Captive language) which is with all the negative natures and negative personality in everyman.

20. Could you, the scientific realm anywhere in the globe, come to the standard to tap the always moving four types of waves of ideologies everywhere in the universe such as: (i) the universally moving **waves of ideas**—mainly in the Matter universe—(ii) the universally moving **waves of ideologies**—both in the two layers as in the Space universe and in the Matter universe—(iii) the universally moving **waves of knowledge**—through the three layers, that are through the Horizon universe, through the Space universe till the Matter

universe—and (iv) the universally moving **waves of Constituted hidden knowledge**—through all the four layers of the universe originating from the Vacuum universe and passing and coming down to the Matter universe through the Horizon universe and Space universe.

21. Could you know the hidden secret of the setting of the universe?

The Ever-past Great Creation Power is the reason for the gradual processes of creation from Infinity and the Ever-past Great Creation Energy is the reason for the proceeding of enormous fervent heat to set the Matter universe. This setting happens at the end of the gradual processes of creation from Infinity.

**Thus there are two main steps
for the formation of the universe.**

- I. The gradual processes of creation from Infinity that ended up with the emergence of the neutral elements
- II. The Automatic set-up of creation for the Matter universe from the dissolution of the neutral elements by the very enormously fervent heat

Let the world incline their ear to hear these two steps of creation in details.
